JANUARY

- 1 **INFORMATION FOR AUTHORS**
 - 5 **GUEST EDITORIAL: A Discussion of Enzyme Reference Materials: Applications and Specifications**
Charles F. Fasce, Jr., Robert Rej, William H. Copeland, and Raymond E. Vanderlinde
 - 10 **REVIEW: Enzymes in Cancer**
Morton K. Schwartz
 - 23 **Detection of Prostaglandin Induction of Erythrocyte Sickling**
Malcolm Johnson, Israel Rabinowitz, Anthony L. Willis, and Paul L. Wolf
 - 27 **The Use of Laboratory Computers in Monitoring Kinetic Enzyme Assays**
G. Phillip Hicks, R. A. Ziesemer, and Norbert W. Tietz
 - 31 **Biological Activity of a Semisynthetic Flavonoid, O-(β -Hydroxyethyl)rutinoside: Light-Scattering and Metabolic Studies of Human Red Cells and Platelets**
J. W. ten Cate, N. J. van Haeringen, J. Gerritsen, and E. Glasius
 - 36 **Sensitive Fluorometric Method for Determination of Quercetin in Plasma or Urine**
R. Gugler and H. J. Dengler
 - 38 **Specific Photometric Determination of 5-Hydroxyindoleacetic Acid in Urine**
Harry Goldenberg
 - 45 **Simplified, Rapid Measurement of [131 I] Triiodothyronine Uptake, with Use of Competitive Charcoal Adsorption**
William R. Holub, Catherine F. Tortorella, and Madeline R. Ruhl
 - 49 **Use and Interpretation of Common Statistical Tests in Method-Comparison Studies**
James O. Westgard and Marian R. Hunt
 - 58 **Trimethylsilylation of Malonate Ester Enols**
O. A. Mamer and S. S. Tjoa
 - 62 **Cooperative Survey of "SMA" Analyzers in Wisconsin—A Method of Improving Interlaboratory Performance**
Ronald H. Laessig, Thomas H. Schwartz, and Toni A. Paskey
 - 67 **Application of Fe(II)- β -Pyridyl Benzodiazepin-2-ones to the Manual or Automated Determination of Serum Uric Acid**
Bernard Klein and Lois B. Lucas
 - 76 **Determination of Lead in Blood and Urine by Anodic Stripping Voltammetry**
Bernard Searle, Wing Chan, and Bernard Davidow
 - 81 **Estimating Correlations from Single-Sample Distributions of Measurements**
Eugene K. Harris
 - 86 **Significance of the LP-X Test in Differential Diagnosis of Jaundice**
D. Seidel, H. Gretz, and Claudia Ruppert
 - 92 **Increased Aspartate Aminotransferase Activity of Serum after In Vitro Supplementation with Pyridoxal Phosphate**
Robert Rej, Charles F. Fasce, Jr., and Raymond E. Vanderlinde
 - 99 **OPINION: Electrophoresis, Specific Protein Assays, or Both in Measurement of Plasma Proteins?**
Carl Bertil Laurell
- ## SCIENTIFIC NOTES
- 103 **AutoAnalyzer Assay for Serum Alkaline Phosphatase Activity, with Sodium Thymolphthalein Monophosphate as Substrate**
Gary J. Proksch, Dean P. Bonderman, and John A. Griep
 - 106 **Rapid Lipid-Staining Procedure for Paper Electrophoretograms**
Herbert K. Naito and Lena A. Lewis
 - 109 **Evaluation of "Dexsil 300 GC" as Stationary Phase in Gas Chromatography of Triiodothyronine and Thyroxine in Human Serum**
Mohammed Tajuddin and Stanley G. Elfbaum
 - 113 **A Statistical Model for Assessing the Need for Medical Care in a Health Screening Program**
Stuart C. Hartz
 - 116 **Semiautomated Enzymatic Method for Determining Serum Triglycerides by Use of the Beckman "DSA 560"**
Nabeeh Mourad, Ronald Zager, and Peter Neveu
 - 118 **Colorimetric Determination of 2,3-Diphosphoglycerate in Whole Blood**
Anita V. Luisada-Opper
 - 121 **Use of Ferric Ammonium Sulfate in Serum Cholesterol Determination**
Hsien-wen Feng, Chung-miu Pi, Rong-bor Wang, and Li-chuen Chen
 - 123 **Anomalous Response of Macroamylase to Assay Temperature**
Arthur R. Henderson, John King, and Clement W. Imrie
 - 125 **Radioassay of Serum Folate, with Use of a Serum Blank and Nondialyzed Milk as Folate Binder**
Mohammed Tajuddin and Henry A. Gardyna
 - 127 **Improved Manual and Automated Colorimetric Determination of Serum Glucose, with Use of Hexokinase and Glucose-6-Phosphate Dehydrogenase**
Holly J. Coburn and James J. Carroll
 - 131 **Monroe E. Freeman—An Appreciation**
Max M. Friedman
 - 132 **THE CLINICAL CHEMIST**
J. S. King, Jr.
- ## LETTERS
- 140 **Increased Activity of Serum Aspartate Aminotransferase in the Presence of Added Pyridoxal-5'-Phosphate**
Andrew G. Ury and Joel R. Chassy
 - 140 **Use of Gelatin-Coated Charcoal in Digoxin Immunoassay**
Axel Brock
 - 141 **Trace-metal Contaminants in Filter Paper**
J. C. Meakin
 - 142 **BOOK REVIEWS**
George Bryson, Samuel Meites, and N. Radin

- 145 **EDITORIAL: Radioimmunoassay**
J. Stanton King, Jr.

Special Section: Radioimmunoassay

- 146 **REVIEW: Radioimmunoassay**
D. S. Skelley, L. P. Brown, and P. K. Besch
- 187 **Radioimmunoassay of Plasma Digoxin, with Use of Iodinated Tracer**
E. D. Morgan and W. J. Riley
- 191 **Counting of Beta and Gamma Emitters Used in Clinical Radioimmunoassays and Competitive-Binding Assays by Liquid Scintillation Counters**
Edith Zak Helman and Philip Ting
- 197 **Overnight Radioimmunoassay of Human Follicle-Stimulating Hormone**
Loretta P. Brown, Paige K. Besch, Dean S. Skelley, and Veasy C. Buttram, Jr.
- 201 **Critical Variables in the Radioimmunological Technique for Measuring Immunoreactive Insulin with Use of Immunosorbents**
Carlos A. Velasco, Werner Oppermann, and Rafael A. Camerini-Davalos
- 205 **Conditions for a Radioimmunoassay of Serum Parathyroid Hormone**
Daisy S. McCann, JoAnn Prunty, Gerald Rigg, and Robert Arnstein
- 210 **Simple Radioimmunoassay of Five Unconjugated Ovarian Steroids in a Single Sample of Serum or Plasma**
John E. Powell and Vernon C. Stevens
- 216 **A Sensitive, Rapid Radioimmunoassay for Morphine and Immunologically Related Substances in Urine and Serum**
Don Catlin, Roy Cleeland, and E. Grunberg
- 221 **Australia Antigen Content of Commercial Quality-Control Sera**
R. G. Simon, L. A. Langhofer, Jr., and E. J. Hendricks

- 223 **Rapid Single-Step Kinetic Colorimetric Assay for Lactate Dehydrogenase in Serum**
Charles C. Allain, Carl P. Henson, M. Keith Nadel, and Adam J. Knoblesdorff
- 228 **Polacrylamide-Gel Disc-Electrophoresis as a Screening Procedure for Serum Lipoprotein Abnormalities**
Herbert K. Naito, Mitsuo Wada, L. A. Ehrhart, and Lena A. Lewis
- 235 **Polyacrylamide-Gel Block-Electrophoresis of Plasma Lipoproteins**
Mitsuo Wada, Herbert K. Naito, L. A. Ehrhart, and Lena A. Lewis
- 240 **Automated Kinetic Spectrophotometric Assays of Enzyme Activities of Human Cerebrospinal Fluid: Methods and Reference Values**
David M. Sharpe, A. Ross Wilcock, and David M. Goldberg
- 248 **Identification of Lithocholic Acid and Measurement of Other Bile Acids in Serum of Healthy Humans**
E. D. Pellizzari, F. S. O'Neil, R. W. Farmer, and L. F. Fabre, Jr.
- 253 **Evaluation of a Glucose Oxidase-Peroxidase Method Adapted to the Single-Channel AutoAnalyzer and SMA 12/60**
Stanley J. Miskiewicz, Bill B. Arnett, and Gerald E. Simon

SCIENTIFIC NOTES

- 258 **Nonspecific Interferences in the Fluorometric Determination of Plasma Cortisol**
Thomas R. Koch, Leila Edwards, and Max E. Chilcote

- 251 **Additional Observations of Hydrochlorothiazide Interference with Measurement of Total Urinary Placental Estrogens**
A. Arnaldo Acosta, Linda B. Madeira, Paige K. Besch, and Veasy C. Buttram, Jr.
- 253 **Some Drugs and Other Substances That Interfere with Protein Determination**
D. H. Pashley, G. S. Schuster, P. Palmer, and M. M. Sharawy

- 267 **THE CLINICAL CHEMIST**
J. S. King, Jr.

LETTERS

- 279 **Modified Radioimmunoassay of Urinary Aldosterone**
T. Sivakumaran, F. Galindo, and J. Teal
- 280 **Creatine Kinase: ATP Contaminating Creatine Phosphate Substrate of a Commercial Kit**
Joseph Tesfaye, Jacques Longpré, and Frank Bodley
(Reply)
Sigrid Klotzsch
- 281 **Radioassay of Serum Folate: Some Criticisms**
William Shaw
- 282 **Serum Globulin Assay**
Morris Goldberg and Andrew Sardi
- 282 **Enzyme Determinations: Criticisms of Some Recent Reports**
Raymond E. Vanderlinde, Robert Rej, and Charles F. Fasce, Jr.
(Reply)
P. L. Wolf, D. Williams, N. Coplon, and A. S. Coulson
(Reply)
Bernard E. Statland and Allan L. Louderback
- 284 **Modified Sickie Cell Anemia Screening Procedure**
Henri Weems

BOOK REVIEWS

- Robert B. McComb, H. O. Goodman, Norbert I. Swislocki, Gregg Hardy, J. Stanton King, Jr., W. E. Cornatzer, George N. Bowers, Jr., James O. Westgard, and F. W. Sunderman, Jr.

CORRECTIONS

MARCH

- 291 **GUEST EDITORIAL: An Idea Whose Time Has Come**
J. Paul Cali
- 294 **Specific Analysis of Immunoglobulins. Techniques and Clinical Value**
Joseph F. Heremans and Pierre L. Masson
- 301 **Automated Fluorometric Method for Screening for Erythrocyte Glucose-6-Phosphate Dehydrogenase Deficiency**
Larry G. Dickson, Carl B. Johnson, and Donald R. Johnson
- 304 **A Multi-Purpose Miniature Computer for Clinical Applications**
Harry L. Pardue, Russell A. Parker, and Henry Gaw
- 308 **Modified Glucose Oxidase Method for Determination of Glucose in Whole Blood**
Samuel Meites and Karen Sanieel-Banrey
- 312 **Method for Determination of Cyclic AMP in Plasma**
Babeth Rabinowitz and Joseph Katz

- 315 Urinary Guanidinoacetate / Guanidinosuccinate Ratio: An Indicator of Kidney Dysfunction**
Masahide Sasaki, Kihachiro Takahara, and Samuel Natelson

- 322 Evaluation of the Delves Micro System for Blood Lead Analysis**
Jocelyn M. Hicks, Aida N. Gutierrez, and Brenda E. Worthy

- 326 Ultramicro Method for Determination of Iron in Serum with the Graphite Furnace**
Eugene D. Olsen, Peter I. Jatlow, Frank J. Fernandez, and Herbert L. Kahn

- 330 Theoretical Considerations and Models of Red and White Cell Pentose Cycles**
James M. Hodges and H.-D. Grümer

SCIENTIFIC NOTES

- 338 Stable Reagents for Determination of Serum Triglycerides by a Colorimetric Hantzsch Condensation Method**
Lowell B. Foster and Ralph T. Dunn

- 340 Simple Gas-Liquid Chromatographic Method for Confirming the Presence of Alkaloids in Urine**
H. E. Sine, N. P. Kubasik, and J. Woytash

- 345 THE CLINICAL CHEMIST**
J. S. King, Jr.

- 352 BOOK REVIEWS**
William A. Warren, Donald S. Young, T. P. Whitehead, and Paul Melius

LETTERS

- 356 New Spray for Thin-Layer Chromatograms of Narcotics**
Torben Neesby

- 359 A Source of Variation in the Gas-Chromatographic Assay of Phenobarbital Treated with Trimethylanilinium Hydroxide**
J. C. VanMeter and H. William Gillen

APRIL

- 361 REVIEW: Toxicological Findings in Fatal Poisonings**
Arthur J. McBay

- 366 OPINION: The Usefulness of Laboratory Tests in Health-Screening Programs**
David L. Sackett

- 373 HISTORY: The Scientific Development of Clinical Chemistry to 1948**
Wendell T. Caraway

- 384 Turbidimetric Procedure for Determination of Lipase Activity**
Angelo Burlina and Lauro Galzigna

- 387 Interpretation of Hyperamylasemia in Diabetic Coma**
Francesco Belfiore and Elena Napoli

- 390 Automated Fluorometric Determination of Amphetamine in Urine**
T. S. Hayes

- 395 Influence of Demographic Factors on Serum Concentrations of Seven Chemical Constituents in Healthy Human Subjects**
David M. Goldberg, Alan J. Handyside, and David A. Winfield

- 403 Nephelometric Studies of the Precipitin Reaction: A Model System for Specific Protein Measurements**
L. M. Killingsworth and John Savory

- 408 Improved Method for Specific Determination of Creatinine in Serum and Urine**
Robert J. Mitchell

- 411 Comparison of the Stannous Chloride and Vanadate Methods for Estimation of Serum Inorganic Phosphorus by Use of the "SMA-12/60"**
Janet L. Davies, G. S. Andrews, R. Miller, and H. G. Owen

- 415 Gradient Gel Electrophoresis of Human Plasma Lipoproteins**
G. J. Bautovich, M. J. Dash, W. J. Hensley, and J. R. Turtle

- 419 Colorimetric Microdetermination of Free Fatty Acids**
Felix G. Soloni and Laura C. Sardina

- 425 Reduction of Glyoxylate by Human Serum**
G. Young, F. Naghizadeh, J. King, and H. G. Morgan

SCIENTIFIC NOTE

- 429 Fecal Nickel Excretion by Healthy Adults**
Eva Horak and F. William Sunderman, Jr.

- 431 BOOK REVIEWS**
Richard A. Hudson, John A. Lott, and H.-D. Gruemer

LETTERS

- 433 Diphenylhydantoin Interference with Spectrophotometric Barbiturate Estimations**
R. N. Gupta and P. M. Keane
(Reply)
R. G. Cooper, M. S. Greaves, and G. Owen

- 434 Stanbio and "Tekit" Methods for Placental Estrogens Compared**
Paige K. Besch, Veasy C. Buttram, Jr., and Norma F. Besch

- 434 A Common Error in Measurements at 340 nm**
Otto Schales

- 435 Impurity in γ -Glutamyl *p*-Nitroanilide Used as Substrate for D-Glutamyl Transferase**
J. A. Rowe, D. Tarlow, and S. B. Rosalki

- 436 **Bilirubin Interference with Ultraviolet Determination of Inorganic Phosphate on the "Centrifichem"**
Michael A. Pesce and Selma S. Bodourian

- 438 **THE CLINICAL CHEMIST**
J. S. King, Jr.

MAY

- 447 **REVIEW: Serum Enzymes in Diabetes Mellitus**
Francesco Belfiore, Luigi Lo Vecchio, and Elena Napoli
- 453 **An Approach to the Measurement of Total Lipid Glycerol in Serum**
Donald L. Horney
- 459 **Urinary Homogentisic Acid: Determination by Thin-Layer Chromatography**
Jerome M. Feldman and June Bowman
- 463 **Rapid Method for Screening for Galactosemia and Galactokinase Deficiency by Measuring Galactose in Whole Blood Spotted on Paper**
Andre Grenier and Claude Laberge
- 466 **Microdiffusion Method for Estimation of Cyanide in Whole Blood and Its Application to the Study of Conversion of Cyanide to Thiocyanate**
A. R. Pettigrew and G. S. Fell
- 472 **Trace-Element Contamination in Biopsies of the Liver**
J. Versieck, A. Speecke, J. Hoste, and F. Barbier
- 476 **Quantitative Determination of Serum Triglycerides by the Use of Enzymes**
Giovanni Bucolo and Harold David
- 483 **Biochemical Properties of Human Prostatic Acid Phosphatase**
K. W. Lam, Olivia Li, C. Y. Li, and L. T. Yam
- 488 **Estimation of Norms from a Controlled Sample Survey. II. Influence of Body Habitus, Oral Contraceptives, and Other Factors on Values for the Normal Range Derived from the SMA 12/60 Screening Group of Tests**
J. W. Winkelman, D. C. Cannon, V. J. Pileggi, and A. H. Reed
- 492 **Rapid Method for Quantitative Determination of Propoxyphene in Serum by Gas-Liquid Chromatography**
M. A. Evenson and Susan Koeliner
- 496 **Determination of Serum and Urinary Phenylalanine by Gas Chromatography**
Z. K. Shihabi and G. K. Summer
- 499 **Accurate Micromethod for Estimation of Both Medium- and Long-Chain Fatty Acids and Triglycerides in Fecal Fat**
Charles G. Massion and Michael D. McNeely
- 506 **A Modified Indirect Method for Determining Erythrocyte Sodium and Potassium Concentrations**
Larry L. Small and Dwight B. Coulter
- 511 **Improved Measurement of Corticosteroids in Plasma and Urine by Competitive Protein-Binding Radioassay**
Miguel Ficher, George C. Curtis, V. K. Ganjam, Leon Joshlin, and Sarah Perry
- 516 **Determination of Serum Calcium by Use of an AutoAnalyzer I-II Hybrid**
C. L. Jacklyn, C. D. Freeman, M. E. Gray, and M. A. MacAulay

SCIENTIFIC NOTES

- 521 **Automated Atomic Absorption Spectrophotometry**
H. J. Gitelman, C. Soucek, and J. F. Owen

- 522 **Determination of Uric Acid in Serum, with Use of Uricase and a Tribromophenol-Aminoantipyrene Chromogen**
Peter Kabasakalian, Sami Kalliney, and Anita Westcott
- 524 **Intercomparison of Results Obtained with Five Commercial Diffusion Plates Supplied for Quantitation of Immunoglobulins**
Thomas A. Hosty, Mary Hollenbeck, and Sheila Shane
- 526 **An Automated Procedure, with Use of Ferrozine, for Assay of Serum Iron and Total Iron-Binding Capacity**
J. M. White and H. A. Flashka
- 529 **Stability of Erythrocytic Enzymes for Screening Tests**
Mei L. Lowe, Jerry B. Gin, and James A. Demetriou
- 531 **Formaldehyde Interference in the Uric Acid-Phosphotungstic Acid Redox**
Bernard Klein and Joan Sheehan
- 533 **Comparison of Results for Three Methods of Hemoglobin S Identification**
Edward J. Hicks, John A. Griep, and Carleton D. Nordschow
- 535 **CORRECTIONS**
- 536 **SCIENTIFIC PROGRAM, 25th NATIONAL MEETING**

- 553 **THE CLINICAL CHEMIST**
J. S. King, Jr.
- 556 **BOOK REVIEWS**
Samuel Meites, Murdina M. Desmond, and Elias Amador
- LETTERS**
- 559 **Stability of Sera**
Robert L. Kascht and Vernon A. Nelson
- 559 **Assay of Erythromycin Esters**
D. W. Hughes and W. L. Wilson
- 559 **Possible Error Resulting from Use of "Nitrogen-Filled" Vacutainers for Blood-Gas Determinations**
Gordon E. Lang, Rudolph G. Mueller, and Patricia K. Hunt

JUNE

- 565 **Free Calcium in Serum. I. Determination with the Ion-Specific Electrode, and Factors Affecting the Results**
Jack H. Ladenson and George N. Bowers, Jr.
- 575 **Free Calcium in Serum. II. Rigor of Homeostatic Control, Correlations with Total Serum Calcium, and Review of Data on Patients with Disturbed Calcium Metabolism**
Jack H. Ladenson and George N. Bowers, Jr.
- 583 **Concentrations in Serum and Urinary Excretion of Guanidine, 1-Methylguanidine, and 1,1-Dimethylguanidine in Chronic Renal Failure**
Israel M. Stein and Michael J. Micklus
- 586 **Gas-Chromatographic-Mass-Spectrometric Determination of Urinary Acid Profiles of Normal Young Adults on a Controlled Diet**
Thomas A. Witten, Steven P. Levine, Julia O. King, and Sanford P. Markey
- 590 **Simultaneous Determination of Carbamazepine ("Tegretol") and Other Anticonvulsants in Human Plasma by Gas-Liquid Chromatography**
Jean-Claude Roger, George Rodgers, Jr., and Alex Soo

- 593 Determination of Total Organic Acids in Urine by Extraction with Organic Solvents**
Leo Kesner, Tsai-Tse Yao, and Ralph B. Dell
- 597 Measurement of Hexoses and Pentoses, Singly or in Combination, with o-Anisidine**
Jesse F. Goodwin and Hugh Y. Yee
- 602 Radioimmunoassay of Human Chorionic Somatomammotropin in Serum, Amniotic Fluid, and Urine**
Russell J. Moser and Dorothy R. Hollingsworth
- 608 Effect of the Use of Cholesterol Digitonide in Standards on the Results of Estimation of Cholesterol in Blood and Tissues by the Schoenheimer-Sperry Method**
A. Venugopala Rao and S. Ramakrishnan
- 611 Modified Pisano Method for Estimating Urinary Metanephries**
R. N. Gupta, D. Price, and P. M. Keane
- 615 Methaqualone Overdose: Analytical Methodology, and the Significance of Serum Drug Concentrations**
David N. Bailey and Peter I. Jatlow

SCIENTIFIC NOTES

- 621 Evaluation of EDTA as the Chelator in the Biuret Reagent**
Harold Van Kley and Carol S. Claywell
- 623 Evaluation of an Automated Creatininase Creatinine Procedure**
Monty H. McLean, Jerry Gallwas, and Mark Hendrixson

25th NATIONAL MEETING, AACC

- 626 Symposia Lecturers and Abstracts**
- 635 Workshops**
- 637 Panel**
- 640 Abstracts of Papers**

LETTERS

- 686 Interference with the Amylolytic Determination of Serum Amylase**
J. W. Carter, W. G. Staples, and E. Simson
- 687 Efficient, Low-Cost Gas Manifold for Use in Sample Concentration**
S. Y. Yeh, Harold Flanary, and Jewell Sloan
- 688 Digoxin Radioimmunoassay: Dealing with a Loss of Sensitivity**
Roy F. Schall, Jr.

BOOK REVIEWS

- 690 Elias Amador, Elizabeth B. Solow, and Lena A. Lewis**

THE CLINICAL CHEMIST

J. S. King, Jr.

JULY

- 699 REVIEW: Principles of Competitive Binding Assays (Saturation Analyses). I. Equilibrium Techniques**
Alfred Zettner
- 706 Semiautomated Method for Analysis of 11-Deoxy-17-Oxo Steroids in Urine. A Preliminary Report**
John W. Moore

- 710 Fluorometric Determination of Plasma 11-Hydroxycorticosteroids. I. Rapid Procedure for Clinical Screening**
Luis E. Mejer and Roberta C. Blanchard
- 718 Fluorometric Determination of Plasma 11-Hydroxycorticosteroids. II. Studies on the Specificity of the Method**
Luis E. Mejer and Roberta C. Blanchard
- 725 Variability of Standard Curves in Radioimmunoassay of Plasma Digoxin**
George H. Burnett, Robert L. Conklin, Gertrude W. Wasson, and Archie A. MacKinney
- 727 Direct Measurement of Chloride in Sweat with an Ion-Selective Electrode**
LaVerne Szabo, Margaret A. Kenny, and Winnie Lee
- 731 Simultaneous Competitive Protein Binding Assay for Cortisol, Cortisone, and Prednisolone in Plasma, and Its Clinical Application**
Adrian K. Turner, Carthage J. Carroll, Jack L. Pinkus, David Charles, and Sati C. Chatteraj

- 737 Improved Techniques for Assessment of Plasma Lipoprotein Patterns. I. Precipitation in Gels after Electrophoresis with Polyanionic Compounds**
Dietrich Seidel, Heinrich Wieland, and Claudia Ruppert

- 740 Radioimmunoassay of Serum Estrogen**
Nai-Siang Jiang, Robert J. Ryan, and A. Albert

- 748 Comparison of Results by Four Different Procedures for Determination of 17-Hydroxycorticosteroids**
Joseph Bruton, Ting-Kai Li, and Gerald D. Smith

- 753 Efficiency and Sensitivity of Two Common Screening Methods for Detecting Morphine in Urine**
Charles W. Gorodetzky

- 756 Evaluation of S-Benzyl-L-cysteine-4'-nitroanilide as a Substrate for Serum Cystine Aminopeptidase**
J. E. Tovey, P. J. G. Dawson, and K. P. Fellowes

- 762 Assay of "Soluble Fibrinogen" in Bloodstain Extracts as an Aid to Identification of Menstrual Blood in Forensic Science: Preliminary Findings**
P. H. Whitehead and G. B. Divall

- 766 Kinetic Colorimetric Measurement of Serum Lactate Dehydrogenase Activity**
Arthur L. Babson and Susan R. Babson

- 770 CASE REPORT: Problems in the Laboratory Diagnosis of Alcaptonuria**
Jiri Frohlich, George E. Price, and Donald J. Campbell

SCIENTIFIC NOTES

- 774 Nonutility of Measurement of Serum Gamma-Glutamyl Transpeptidase Activities in Diagnosis of Myocardial Disease**
Virginia P. Cook and N. Kent Carter

- 776 Technical Improvements in Measurement of L-Aspartate:2-Oxoglutarate Aminotransferase Activity in Serum by Diazonium Salt Coupling**
Leo G. Morin and Jerome Prox

- 779 HISTORY: AACC Awards**
Ruth D. McNair

LETTERS

- 783 UV Spectrophotometry in Medium-Band Instruments**
Samuel A. Morell and Basil T. Doumas

- 785 Radioassay of Folate**
Sheldon P. Rothenberg and Maria da Costa

- 786 Immunochemical Identification of Prostatic Tissue-Specific Acid Phosphatase**
Richard J. Ablin
(Reply)

Vita Milisaukas and Noel R. Rose

- 788 GC Assay of Phenobarbital**
Robert J. Perchalski and B. J. Wilder

- 789 "Standards" in Clinical Chemistry**
Samuel Meites

- 790 Precise Descriptions in Papers**
Rudolph G. Mueller and Gordon E. Lang

- 791 Serum Sodium Measurement by Manual and On-Line Dilutions**
Guy T. Haven and Mary C. Haven

- 791 Australia Antigen in Commercial Sera**
Guillermo Anido

- 792 Effect on Chemical Values of Using Polystyrene Beads for Serum Separation**
Solomon Notrica, Marston W. Klein, Don S. Miyada, and Robert M. Nakamura

- 793 RIA: An Historical Note**
James A. Pittman, Jr.

BOOK REVIEWS

- 794 Nelson L. Alpert, Fritz Bischoff and George Bryson, George Bryson, and P. John Pegg**

- 798 THE CLINICAL CHEMIST**
J. S. King, Jr.

AUGUST

Fifth Annual Symposium on Advanced Analytical Concepts for the Clinical Laboratory, March 15 and 16, 1973. Sponsored by the Oak Ridge National Laboratory and the National Institute of General Medical Sciences

- 801 GUEST EDITORIAL: The Impact of Genetics**
DeWitt Stetten, Jr.

- 806 INTRODUCTION**
Charles D. Scott and Robert S. Melville

I. ADVANCED CONCEPTS

- 807 Application of Inductively-Coupled Plasma Excitation Sources to the Determination of Trace Metals in Micro-liter Volumes of Biological Fluids**
Richard N. Kniseley, Velmer A. Fassel, and Constance C. Butler

- 813 Development and Application of a Rapid Cell Sorter**
H. R. Hulett, W. A. Bonner, R. G. Sweet, and L. A. Herzenberg

- 817 Sensitive Fluorescence Monitoring of Aromatic Acids after Anion-Exchange Chromatography of Body Fluids**
S. Katz, W. W. Pitt, Jr., and G. Jones, Jr.

- 821 Homogeneous Enzyme Immunoassay for Opiates in Urine**
Richard S. Schneider, Peggy Lindquist, Emmy Tong-in Wong, Kenneth E. Rubenstein, and Edwin F. Ullman

- 826 Computer Technique for Identification of Chromatographic Peaks**
D. D. Chilcote

- 832 Relationship between Variables in Instrument Perfor-**

mance and Results of Kinetic Enzyme Assays—A System View
Ernest Maclin, Donald Rohlfing, and Manoug Ansour

- 838 Design, Construction, and Two Applications for an Automated Flow-Cell Polarization Fluorometer with Digital Read Out: Enzyme-Inhibitor (Antitrypsin) Assay and Antigen-Antibody (Insulin-Insulin Antiserum) Assay**
Richard D. Spencer, Fernando B. Toledo, Ben T. Williams, and Norma L. Yoss

II. ANALYTICAL SYSTEMS

- 845 Use of Stable Isotopes in Measuring Low Concentrations of Drugs and Drug Metabolites by GC-MS-COM Procedures**
M. G. Horning, J. Nowlin, K. Lertratanangkoon, R. N. Stillwell, W. G. Stillwell, and R. M. Hill

- 853 Electronic Cell-Volume Analysis by Use of the AMAC I Transducer**
R. C. Leif and R. A. Thomas

- 871 Fluorometric Fast Analyzer: Some Applications to Fluorescence Measurements in Clinical Chemistry**
T. O. Tiffany, M. B. Watsky, C. A. Burtis, and L. H. Thacker

- 883 Clinical Laboratory Use of Differential Light Scattering. I. Antibiotic Susceptibility Testing**
V. R. Stull

- 891 An All Solid-State Electrochemical Electrolyte Analyzer**
Melvin D. Smith, Robert W. Rogers, Marvin A. Genshaw, and Jerome Greyson

- 895 Development of an Analytical System Based Around a Miniature Fast Analyzer**
C. A. Burtis, W. F. Johnson, J. C. Mailen, J. B. Overton, T. O. Tiffany, and M. B. Watsky

- 904 Gas-Chromatographic Measurement of Urinary Polyamines in Cancer Patients**
M. Drue Denton, Helen S. Glazer, David C. Zellner, and Frank G. Smith

III. APPLICATIONS AND EXPERIMENTAL RESULTS

- 908 Evaluation of Kinetic Enzyme Parameters by Use of a Small Computer Interfaced "Fast Analyzer"—An Addition to Automated Clinical Enzymology**
T. O. Tiffany, D. D. Chilcote, and C. A. Burtis

- 919 Use of High-Pressure Liquid Chromatography for Monitoring Nucleotide Concentration in Human Blood: A Preliminary Study with Stored Blood Cell Suspensions**
Phyllis R. Brown, R. E. Parks, Jr., and Jane Herod

- 923 Measurement of Putrescine, Spermidine, and Spermine in Physiological Fluids by Use of an Amino Acid Analyzer**
Laurence J. Marton, Diane H. Russell, and Carl C. Levy

- 927 Monitoring Phenylalanine-Tyrosine Metabolism by High-Resolution Liquid Chromatography of Urine**
J. E. Mrochek, S. R. Dinsmore, and D. W. Ohrt

- 937 Automated Reaction-Rate Method for the Direct Determination of Total Serum Cholesterol by Use of the "CentrifChem" Parallel Fast Analyzer**
K. A. Slickers, L. Edwards, J. Daly, and G. Ertingshausen

SEPTEMBER

- 943 REVIEW: Effects of Lysine on Ammonia Formation, Hydrogen Ion, and Potassium Ion Balance: A Review and an Hypothesis**
Jack I. Zweig

- 950 Automated Measurement of Urinary Iodine**
Philip J. Garry, D. Wayne Lashley, and George M. Owen

- 954 **A Simplified Determination of Urinary Cadmium, Lead, and Thallium, with Use of Carbon Rod Atomization and Atomic Absorption Spectrophotometry**
Norman P. Kubasik and Michael T. Volosin
 - 959 **Single Glucose Oxidase-Peroxidase Reagent for Two-Minute Determination of Serum Glucose**
Leo G. Morin and Jerome Prox
 - 963 **Gas-Chromatographic-Mass-Spectrometric Determination of Urinary Acid Profiles of Normal Young Adults. II. The Effect of Ethanol**
Thomas A. Witten, Steven P. Levine, Mary T. Killian, Peter J. R. Boyle, and Sanford P. Markey
 - 967 **A Modified Procedure for Evaluation of the Lecithin/Sphingomyelin Ratio in Amniotic Fluid**
Emily Coch, John S. Meyer, Gordon Goldman, and Gerald Kessler
 - 973 **Evaluation and Recalculation of Manufacturer's Instrument-Specific Aspartate Aminotransferase Values for Reference Sera**
Ronald H. Laessig, Andris Indriksons, Thomas H. Schwartz, and Toni A. Paskey
 - 977 **Plasma Retinol Assay by Elution from Silicic Acid with Cymene (*p*-Isopropyl Toluene)**
J. Dennis Pollack, George M. Owen, Philip J. Garry, and Donna Clark
 - 984 **Standardization in Bilirubin Assays: Evaluation of Selected Methods and Stability of Bilirubin Solutions**
Basil T. Dumas, Billy Wayne Perry, Edward A. Sasse, and Jon V. Straumfjord, Jr.
 - 994 **Evaluation of Direct and Indirect Coupled Enzyme Assay Systems for Measurement of Creatine Kinase Activity**
E. C. Dinovo, D. S. Miyada, and R. M. Nakamura
 - 998 **Liquid-Scintillation Counting of ^{57}Co —Application to the Radioassay of Vitamin B₁₂**
Sidney Gutcho, James Johnson, and Henry McCarter
 - 1002 **Determination of Gold in Drugs and Serum by Use of Anodic Stripping Voltammetry**
G. M. Schmid and G. W. Bolger
 - 1006 **Simplified Gas Chromatography of Trimethylsilyl Esters of C₁ through C₅ Fatty Acids in Serum and Urine**
O. A. Mamer and B. F. Gibbs
 - 1010 **Spectrophotometric Quantification of Glycine in Serum and Urine**
Jesse F. Goodwin and Suresh Stampwala
 - 1016 **Rapid Radioimmunoassay of Triiodothyronine**
Christine B. Sekadde, W. Roy Staunwhite, Jr., and Thomas Aceto, Jr.
 - 1022 **Automated Method for Serum Glucose with *p*-Hydroxybenzoic Acid Hydrazide**
Benjamin Fingerhut
 - 1027 **Purification of Progesterone Antiserum for Radioimmunoassay, by Chromatography on QAE-Sephadex A-50**
Frank H. Bodley, Alcide Chapdelaine, and Kenneth D. Roberts
 - 1031 **Determination of 3-Methoxy-4-Hydroxyphenylethylene Glycol, a Noradrenaline Metabolite, in Cerebrospinal Fluid and Urine**
R. O'Keeffe and B. W. L. Brooksbank
 - 1036 **Application of an Automated Determination of Isoenzyme-5 of Lactate Dehydrogenase to the Diagnosis of Hepatic Disease**
Lawrence E. Nathan, Jr., Donald Feldbruegge, and James O. Westgard
 - 1040 **Gas Chromatography in Diagnostic Biochemistry of Abnormal Valine Metabolism**
Hugh N. Tucker and Samuel V. Molinary
 - 1045 **A "Reagentless" Fluorometric Method for Creatine Kinase Activity in Serum**
Herbert K. Y. Lau and George G. Guilbault
 - 1049 **Relationships among Urinary Aminoimidazolecarboxamide in Urine and Folate, and Vitamin B₁₂ Concentrations in Serum**
J. W. Harrison, B. A. Slade, and W. Shaw
 - 1053 **Standard Reference Materials: Standard Quartz Cuvettes for High-Accuracy Spectrophotometry**
R. Mavrodineanu and J. W. Lazar
 - 1058 **Radioimmunoassay of Digoxin: An Intercomparison of Results with Three Methods**
Sidney Gutcho, Henry McCarter, and Raul Rapun
 - 1060 **Ratiometric Triglyceride Analysis by Use of a Centrifugal Analyzer**
Arthur D. Olson and Richard L. Brennan
 - 1063 **Radioimmunoassay of Thyroxine in Unextracted Serum, by a Single-Antibody Technique**
Ralph T. Dunn and Lowell B. Foster
 - 1067 **CASE REPORT: Values for Urinary Free Cortisol during Treatment with Amino-Glutethimide for Cushing's Syndrome**
Karl W. Schmitt, M.D., Roger Juselius, Ph.D., James Hanlon, and David Steed
- ### SCIENTIFIC NOTES
- 1069 **Evaluation of a Rapid Latex-Agglutination Test for Detection of α_1 -Fetoprotein**
E. Alpert and R. L. Coston
 - 1071 **Propylene Glycol Interference in Determination of Serum and Liver Triglycerides**
Paul H. Lenz, D. Innes Cargill, and Alan I. Fleischman
 - 1075 **Evaluation of the Harleco Apparatus for Determining Carbon Dioxide in Whole Blood**
Bill C. Strever, Carl A. Johnson, and Richard H. Gadsden
 - 1077 **Improved Manual Spectrophotometric Procedure for Determination of Serum Triglycerides**
Sidney P. Gottfried and Bernard Rosenberg
 - 1079 **Effect of Various Diluents on the Activity of Several Enzymes Present in Serum**
Ted W. Fendley, Jane M. Hochholzer, and Christopher S. Frings
 - 1081 **Estimation of Gold in Urine by Atomic Absorption Spectroscopy**
J. V. Dunckley
 - 1082 **Electrophoresis of Hemoglobin on Polyacrylamide Gels: Precise Method for Measurement of Hemoglobin A₂**
Robert F. Williard, Winfred J. Lovell, Bernard J. Dreiling, and Martin H. Steinberg
- ### CORRECTIONS
- 1085 **HISTORY: Some Reminiscences of a Charter Member**
Joseph Benotti

SUBJECT INDEX

AACC

- See also Awards
- See also History
- AACC insignia, 695
- Amniotic Fluid Conference, 440
- board of directors, 345
- board of directors meets, 798
- committee appointments, 133
- conference on education, 1419
- council, 1335
- election, 132
- election results, 1417
- formation of Rocky Mountain section, 439
- Gerulak award, 439
- historical note, 348
- local section officers, 1973, 267
- national meeting, 438
- national meeting, 25th, 1091
- role of the AACC in the education of clinical chemists (A), 638
- stated annual meeting, 1335
- table of organization, 438

Abused drugs

- See Drug assay, Toxicology

Acetylneuraminic acid

- improved automated detn. of bound N-acetylneuraminic acid in serum, 1285

Acid phosphatase

- ammonium thymolphthalein monophosphate, new substrate for alkaline and acid phosphatase detns. in serum, 1135
- beta-glucuronidase, acid phosphatase, and LDH activity in brain tumors (A), 643
- biochemical properties of human prostatic acid phosphatase, 483
- immunochemical identification of prostatic tissue-specific acid phosphatase (L), 786
- improved methods for the detn. of alkaline and acid phosphatase using magnesium thymolphthalein monophosphate (A), 682

Acids, aromatic

- sensitive fluorescence monitoring of aromatic acids after anion-exchange chromatography of body fluids (S), 817

Acids, urinary

- detn. of total organic acids in urine by extraction with organic solvents, 593
- gas-chromatographic-mass-spectrometric detn. of urinary acid profiles of normal young adults on controlled diet, 586

Alanine aminotransferase

- improved colorimetric procedure for detn. of serum alanine aminotransferase and aspartate aminotransferase (A), 670

Albumin

- automated and manual detn. of albumin with bromocresol green and a new ionic surfactant (A), 647
- automated immunoprecipitin detn. of albumin in urine using polymer enhancement (A), 673
- micro techniques for immunochemical measurement of albumin, transferrin,

- and alpha-2 macroglobulin in urine (A), 672

- separation and identn. of an indole contaminant in crystallized human serum albumin (A), 657
- thermochemical investigation of binding of phosphotungstic acid and chloride ion to bovine albumin (A), 657

Alcaptonuria

- problems in laboratory diagnosis of alcaptonuria (CR), 770

Alcohol

- biological aspects of breath-alcohol analysis (A), 667

Alcohols

- detn. of alcohols in whole blood and tissue by pyrolysis gas chromatography (A), 662

Alkaline phosphatase

- ammonium thymolphthalein monophosphate, new substrate for alkaline and acid phosphatase detns. in serum, 1135

- AutoAnalyzer assay for serum alkaline phosphatase activity with sodium thymolphthalein monophosphate as substrate (SN), 103

- clinically useful differentiation of serum alkaline phosphatase iso-enzymes in bone and liver diseases (A), 665

- comparison of methods for serum alkaline phosphatase (AP) (A), 648

- effect of ions on alkaline phosphatase activity (A), 664

- effect of various serum diluents on activity of creatine phosphokinase (CPK), alkaline phosphatase (AP), lactate dehydrogenase (LD), and aspartate transaminase (SGOT) (A), 665

- evaln. of phosphorylethanolamine and phosphoryl choline as substrates for human intestinal alkaline phosphatase (A), 664

- improved methods for the detn. of alkaline and acid phosphatase using magnesium thymolphthalein monophosphate (A), 682

- isoenzyme-altering effect in polyacrylamide gel electrophoresis of serum alkaline phosphatase (A), 661

- isoenzymes of liver alkaline phosphatase in serum of patients with hepatobiliary disorders, 1142

- prepn. of amine salts of thymolphthalein monophosphate and their use for detn. of phosphatase activity (A), 664

- prepn. of amine salts of thymolphthalein monophosphate and their use for measuring phosphatase activity (SN), 1302

- study of p-nitrophenyl phosphate as substrate for serum alkaline phosphatase (A), 682
- test for bacterial alkaline phosphatase: rapid identn. of Serratia organisms, 1248

- use of "three-isoenzyme diagram" in detng. alkaline phosphatase isoenzymes (A), 665

Alpha-2 macroglobulin

- micro techniques for immunochemical measurement of albumin, transferrin, and alpha-2 macroglobulin in urine (A), 672

Alpha-2-pregnoglobulin

- alpha-2-pregnoglobulin (pregnancy-zone protein): an estrogen-dependent macroglobulin elevated in pregnancy and oral contraception (A), 657

Amblyopia

- microdiffusion method for estimation of cyanide in whole blood and its application to the study of conversion of cyanide to thiocyanate, 466

American Board of Clinical Chemistry

- ABCC-approved clinical chemistry training programs, 135
- election results, 798

Amines

- gas-chromatographic measurement of urinary polyamines in cancer patients (S), 904

- measurement of putrescine, spermidine, and spermine in physiological fluids by use of an amino acid analyzer (S), 923

Amino acid analyzer

- measurement of putrescine, spermidine, and spermine in physiological fluids by use of an amino acid analyzer (S), 923

Amino acids

- application of fluorescamine to automated assay of amino acids and other low molecular weight amines in microliter volumes of blood (A), 645

- genetic variation and amino acid metabolism (A), 628

- monitoring phenylalanine-tyrosine metabolism by high-resolution liquid chromatography of urine (S), 927

- microfiltration of serum for improved amino acid resolution by thin layer chromatography (A), 675

- simplified gas chromatographic procedure for detn. of amino acid profiles in serum and urine samples (A), 646

- spectrophotometric quantn. of glycine in serum and urine, 1010

Aminoimidazolecarboxamide

- relationships between urinary aminoimidazolecarboxamide in urine, and folate and vitamin B₁₂ concentrations in serum, 1049

Amino laevulinate dehydratase

- use of "low-lead" Vacutainers for blood collection in ALA-D assay (L), 1087

Ammonia

- effects of lysine on ammonia formation, hydrogen ion, and potassium ion balance: review and hypothesis (R), 943
- rapid detn. of ammonia in perchloric acid supernate from blood, with an ammonia-specific electrode, 1162

- Amniotic fluid**
 amniotic fluid conference, 1324
 considerations in determining
 lecithin/sphingomyelin ratio in amniotic fluid (L), 1224
 detn. of lecithin and sphingomyelin in amniotic fluid (SN), 1394
 interdisciplinary conference on amniotic fluid, 136
 lecithin-sphingomyelin ratio in amniotic fluid by a modified thin layer chromatographic (TLC) method using a commercial precoated plate (A), 658
 modified procedure for evaln. of lecithin: sphingomyelin ratio in amniotic fluid, 967
 origin of elevated amniotic fluid CPK levels and experimental verification of the time factor in intrauterine death (A), 658
 use of stable isotopes in measuring low concentrations of drugs and drug metabolites by GC-MS-COM procedures (S), 845
- Amphetamine**
 automated fluorometric detn. of amphetamine in urine, 390
- Amylase**
 automated method for detng. amylase activity in serum and urine, 1187
 automated modified saccharogenic approach to detn. of serum and urinary amylase, 1384
 detn. of alpha-amylase activity: a unique automated system (A), 644
 improved automated saccharogenic analysis for serum and urinary amylase detns. (A), 645
 interference with amylolytic detn. of serum amylase (L), 686
 interpretation of hyperamylasemia in diabetic coma, 387
 kinetic assay for measurement of amylase activity in serum (A), 645
 kinetic uv method for the detn. of alpha-amylase (A), 644
 simultaneous kinetic measurement of amylase and lipase using an automatic sampling fluoronephelometer (A), 645
 urinary amylase excretion as measured by amylochrome assay (L), 1226
- Analytical errors**
 See Variation, source of
- Analytical system**
 analyst-oriented mechanization with the LKE-Ultralab system (A), 642
- Anemia**
 liquid-scintillation counting of [⁵⁷Co]—application to radioassay of vitamin B₁₂, 998
 relationships between urinary aminimidazolecarboxamide in urine, and folate and vitamin B₁₂ concentrations in serum, 1049
- Anesthesia**
 liver function test and physiological measurements during and after anesthesia (A), 653
- Anodic stripping voltammetry**
 detn. of gold in drugs and serum by anodic stripping voltammetry, 1002
 detn. of lead in blood and urine by anodic stripping voltammetry, 76
- Antibiotic testing**
 clinical laboratory use of differential light scattering. I. antibiotic susceptibility testing (S), 883
- Anticonvulsants**
 common errors in detection of anticonvulsant drugs by gas liquid chromatography (A), 666
 simultaneous detn. of carbamazepine ("Tegretol") and other anticonvulsants in human plasma by gas-liquid chromatography, 590
- Anti-fibrinolytic drug**
 gas-liquid chromatography method for determining concn. of anti-fibrinolytic drug (Amicar) in serum and other biological fluids (A), 660
- Aromatic acids**
 metabolic profiles of aromatic and keto acids in urine, serum, and amniotic fluid (A), 654
- Arthritis**
 automated procedure for detection of rheumatoid arthritis (A), 672
- Aspartate aminotransferase**
 assay of aspartate aminotransferase activity: an interlaboratory study (A), 656
 evaln. and recalcn. of manufacturer's instrument-specific aspartate aminotransferase values for reference sera, 973
 improved colorimetric procedure for detn. of serum alanine aminotransferase and aspartate aminotransferase (A), 670
 increased activity of serum aspartate aminotransferase in the presence of added pyridoxal-5'-phosphate (L), 140
 increased aspartate aminotransferase activity of serum after in vitro supplementation with pyridoxal phosphate, 92
 technical improvements in measurement of L-aspartate:2-oxoglutarate aminotransferase activity in serum by diazonium salt coupling (SN), 776
- Aspartate transaminase**
 effect of various serum diluents on activity of creatine phosphokinase (CPK), alkaline phosphatase (AP), lactate dehydrogenase (LD), and aspartate transaminase (SGOT) (A), 665
 low aspartate transaminase activity in serum of patients undergoing long-term hemodialysis (A), 668
- Atomic absorption**
 analysis of cadmium, lead, and thallium in urine by the carbon rod atomizer and atomic absorption spectrophotometry (A), 670
 atomic absorption spectrometry of Ni, Cu, Zn, Pb, in sweat collected from healthy subjects during sauna bathing, 1288
 automated atomic absorption spectrophotometry (SN), 521
 detn. of lead in blood and urine by anodic stripping voltammetry, 76
 estimation of gold in urine by atomic absorption spectrometry (SN), 1081
 eval. of Delves micro system for blood lead analysis, 322
 fecal nickel excretion by healthy adults (SN), 429
 inherent analytical errors in the measurement of lead in blood using the graphite furnace atomic absorption spectrophotometer (A), 671
 non-flame atomic absorption analysis of metals in blood, urine, and hair (A), 670
 simplified detn. of urinary cadmium, lead, and thallium, with use of carbon rod atomization and atomic absorption spectrophotometry, 954
 the detn. of trace metals at natural levels in biological materials using atomic absorption and the graphite furnace (A), 671
 ultramicro method for detn. of iron in serum with the graphite furnace, 326
- Australia antigen**
 Australia antigen content of commercial quality-control sera, 221
 Australia antigen in commercial sera (L), 791
 Australia antigen in commercial sera (cont.) (L), 1230
- Authors**
 information for authors, 1
- AutoAnalyzer**
 adaptation of some SMA 12:60 procedures to the basic AA system (A), 648
 adaptation of some SMA 12:60 procedures to the basic AA system (A), 681
 application of Fe(II)-5-pyridyl benzodiazepin-2-ones to the manual or automated detn. of serum uric acid, 67
 AutoAnalyzer assay for serum alkaline phosphatase activity with sodium thymolphthalein monophosphate as substrate (SN), 103
 automated atomic absorption spectrophotometry (SN), 521
 automated fluorometric detn. of amphetamine in urine, 390
 automated fluorometric method for screening for erythrocyte glucose-6-phosphate dehydrogenase deficiency, 301
 automated fluorometric micromethod for blood glucose, 1296
 automated glucose methods: evaln. of a glucose oxidase-peroxidase procedure, 1152
 automated measurement of urinary iodine, 950
 automated method for serum glucose with p-hydroxybenzoic acid hydrazide, 1022
 automated modified saccharogenic approach to detn. of serum and urinary amylase, 1384
- automated procedure for detection of infectious mononucleosis (A), 681
 automated reaction-rate method for direct determination of total serum cholesterol with the CentrifChem parallel fast analyzer (S), 937
 comparison of four methods for measuring uric acid: copper-chelate, phosphotungstate, manual uricase, and automated kinetic uricase, 1184
 comparison of results between Technicon SMA 12:60 glucose oxidase method and other automated glucose methods (A), 642
 comparison of stannous chloride and vanadate methods for estimation of serum inorganic phosphorus by use of the SMA 12:60, 411
 cooperative survey of SMA analyzers in Wisconsin: method of improving interlaboratory performance, 62
 detn. of serum calcium by use of an AutoAnalyzer I-II hybrid, 516
 direct detn. of serum cholesterol with ferric perchlorate-sulfuric acid-ethyl acetate reagent, comparison with the Technicon SMA and N24a methods (A), 569
 estimation of norms from a controlled sample survey. II. Influence of body habitus, oral contraceptives, and other factors on values for the normal range derived from the SMA 12:60 screening group of tests, 488
 evaln. and recalcn. of manufacturer's instrument-specific aspartate aminotransferase values for reference sera, 973
 evaln. of a glucose oxidase-peroxidase method adapted to the single-channel AutoAnalyzer and SMA 12:60, 253
 evaln. of direct and indirect coupled enzyme assay systems for measurement of creatine kinase activity, 894
 evaluation of Harleco CO₂ apparatus: comparison with Natelson microgasometer and "SMA 6:60" methods for determining serum bicarbonate (CO₂) (L), 1227
 formaldehyde interference in the uric acid-phosphotungstic acid redox (SN), 531
 improved automated detn. of bound N-acetylneuraminic acid in serum, 1285
 improved automated saccharogenic analysis for serum and urinary amylase detns. (A), 645
 improved manual and automated colorimetric detn. of serum glucose, with use of hexokinase and glucose-6-phosphate dehydrogenase (SN), 127
 measurement of hexoses and pentoses, singly or in combination, with o-anisidine, 597
 modified indirect method for determining erythrocyte sodium and potassium concentrations, 506
 nondialysis modification of Gochman's AutoAnalyzer glucose oxidase glucose method combined with BUN (A), 680
 program for on-line processing of peak type AutoAnalyzer signals (A), 677
 quantitative determination of serum triglycerides by use of enzymes, 476
 ratiometric triglyceride analysis by centrifugal analyzer, 1060
 relationships between urinary aminimidazolecarboxamide in urine, and folate and vitamin B₁₂ concentrations in serum, 1049
 screening for galactosemia and galactokinase deficiency by measuring galactose in whole blood spotted on paper, 463
 serum calibrators in Technicon AAI cholesterol analytical system (A), 650
 single-reagent method for rapid detn. of total bilirubin with the "CentrifChem" analyzer, 1366
 the automated assay of hexosaminidases in serum, 1345
 turbidimetric continuous-flow system for immunochemical quantitation of blood proteins with a modified photometer, 1148
- Automated analysis**
 automated immunochemical analysis: evolution of a new clinical discipline (A), 628

Awards

- Ames award, 693
 Boehringer Mannheim award, 695
 Chicago Clinical Chemists award, 1091
 Fisher award, 694
 Gerulat award, 439
 Joseph H. Roe Award, 798
 Smith Kline & French award, 694
 Warner-Lambert lectureship, 692

Barbiturates

- See Drug analysis
 diphenylhydantoin interference with spectrophotometric barbiturate estimations (L), 1318

Beckman DSA

- automated procedure, with use of ferrozine, for assay of serum iron and total iron-binding capacity (SN), 526

Beckman DSA-560

- evaln. of an automated creatinase creatinine procedure (SN), 623
 semiautomated enzymatic method for detng. serum triglycerides by use of the Beckman DSA 560 (SN), 116

Beckman DSA-564

- automated kinetic photometric procedure for the direct detn. of gamma-glutamyl transpeptidase (GGTP) on a Beckman DSA-564B (A), 655

Bece Jones protein

- specific analysis of immunoglobulins: techniques and clinical value, 294

Beta-glucuronidase

- beta-glucuronidase, acid phosphatase, and LDH activity in brain tumors (A), 643

Bicarbonate

- evaluation of Harleco CO₂ apparatus: comparison with Natelson microgasometer and "SMA 6:60" methods for determining serum bicarbonate (CO₂) (L), 1227

Bile acids

- identification of lithocholic acid and measurement of other bile acids in serum of healthy humans, 248

Bilirubin

- automated single-reagent bichromatic analysis of total bilirubin (A), 683
 bilirubin binding affinity of serum: comparison of qual. and quant.
 Sephadex gel-filtration methods, 1276
 effect of protein base on molar absorptivity and absorption spectra of unconjugated bilirubin (A), 647
 method for extracting unconjugated bilirubin from serum (A), 674
 new and rapid total:direct serum bilirubin procedures using stabilized reagents (A), 674
 separation of bilirubin and biliverdin by thin layer chromatography (A), 647
 single-reagent method for rapid detn. of total bilirubin with the "CentrifChem" analyzer, 1366
 standardization in bilirubin assays: evaln. of selected methods and stability of bilirubin solutions, 984

Biliverdin

- separation of bilirubin and biliverdin by thin layer chromatography (A), 647

Biuret reagent

- evaln. of EDTA as the chelator in the biuret reagent (SN), 621

Blood clotting

- biological activity of a semisynthetic flavonoid, O-(β -hydroxyethyl) rutoside: light-scattering and metabolic studies of human red cells and platelets, 31

Blood-gases

- blood-gas analysis on arterialized capillary using topical vasodilator (A), 668
 evaln. of the Harleco apparatus for determining carbon dioxide in whole blood (SN), 1075
 method for measurement of oxygen in human blood (SN), 1196
 phase equilibrium of oxygen in "nitrogen-filled Vacutainers" (SN), 1198
 possible error resulting from use of "nitrogen-filled" Vacutainers for blood-gas determinations (L), 559
 proficiency testing and quality control program for blood gas analysis (A), 649
 sodium chloride-phosphate buffer for pH standard. in a new blood-gas analyzer with an isotonic sodium chloride bridge, 1243
Blood preservation
 use of high-pressure liquid chromatography for monitoring

- nucleotide concentration in human blood: a preliminary study with stored blood-cell suspensions (S), 919

Blood typing

- coupling of glucose-6-phosphate dehydrogenase and hemoglobin S screening to automated blood group and type detns., 1389

Book reviews

BUN
 nondialysis modification of Gochman's AutoAnalyzer glucose oxidase glucose method combined with BUN (A), 680
Calcium
 detn. of serum calcium by use of an AutoAnalyzer I-II hybrid, 516
 effect of stress and adrenalectomy on plasma calcium, magnesium, and phosphate (A), 642
 free calcium in serum. I. detn. with ion-specific electrode, and factors affecting results, 565
 free calcium in serum. II. rigor of homeostatic control, correlations with

- total serum calcium, and review of data on patients with disturbed calcium metabolism, 575

- improved direct detn. of calcium (A), 648
 spectrophotometric detn. of calcium with chlorophosphonazo III (A), 671

Cancer

- beta and gamma emitters in clinical radioimmunoassays and competitive-binding assays, 191
 biochemical profile and immunoelectrophoretic screening for myeloma and macroglobulinemia (A), 672
 biochemical properties of human prostatic acid phosphatase, 483
 carcinoembryonic antigen in cancer detection (A), 654
 discriminant function and 11-deoxy-17-ketosteroids in patients with breast cancer as compared to normals (A), 679
 enzymes in cancer (R), 10
 evaln. of serum 5'-nucleotidase, leucine aminopeptidase and γ glutamyl transpeptidase in patients with cancer (A), 655
 evaluation of a rapid latex-agglutination test for detection of alpha-fetoprotein (SN), 1069
 gas-chromatographic measurement of urinary polyamines in cancer patients (S), 904
 high resolution gas liquid chromatographic analysis and mass spectrometry applied to bladder cancer studies (A), 667
 immunochemical investigation of the carcinoembryonic antigen (CEA) and other antigens in malignant and non-malignant human tissue extracts (A), 654
 isoenzymes of liver alkaline phosphatase in serum of patients with hepatobiliary disorders, 1142
 measurement of putrescine, spermidine, and spermine in physiological fluids by use of an amino acid analyzer (S), 923
 modified Pisano method for estimating urinary metanephrines, 611
 selenium in blood of normals, cancer patients and patients with other diseases (A), 672
Carbamazepine
 simultaneous detn. of carbamazepine ("Tegretol") and other anticonvulsants in human plasma by gas-liquid chromatography, 590
Carbohydrates
 colorimetric detn. of carbohydrates with m-aminophenol (MAP) (A), 660
Carbon dioxide
 evaln. of the Harleco apparatus for determining carbon dioxide in whole blood (SN), 1075
Carbon rod atomization
 simplified detn. of urinary cadmium, lead, and thallium, with use of carbon rod atomization and atomic absorption spectrophotometry, 954
Carbon rod atomizer
 analysis of cadmium, lead, and thallium in urine by the carbon rod atomizer and atomic absorption spectrophotometry (A), 670
Carcinoembryonic antigen
 beta and gamma emitters in clinical radioimmunoassays and competitive-binding assays, 191
 carcinoembryonic antigen in cancer detection (A), 654
 immunochemical investigation of the carcinoembryonic antigen (CEA) and other antigens in malignant and non-malignant human tissue extracts (A), 654
Cardiac disease
 See Heart disease
Catecholamine
 catecholamine metabolism and the clinical chemist (A), 631
Cell sorter
 development and application of a rapid cell sorter (S), 813
Cells (tissue)
 development and application of a rapid cell sorter (S), 813
 electronic cell-volume analysis by use of the AMAC I transducer (S), 853

- "CentrifChem"**
 bilirubin interference with ultraviolet determination of inorganic phosphate on the "CentrifChem" (L), 436
- Centrifugal analyzer**
 Aminco Rotochem II parallel fast analyzer - an evaluation (A), 641
 automated reaction-rate method for direct determination of total serum cholesterol with the CentrifChem parallel fast analyzer (S), 937
 automated uric acid test for the CentrifChem analyzer using a direct uricase reagent (A), 674
 comparison of two high-speed centrifugal analyzers (A), 641
 detn. of SGOT and SGPT on the CentrifChem fast analyzer: effect of supplementing sera with pyridoxal-5-phosphate (PY5P) (A), 665
 development of analytical system based around a miniature fast analyzer (S), 895
 direct serum cholesterol detns. using the CentrifChem (Union Carbide) parallel fast analyzer (A), 669
 evaluation of kinetic enzyme parameters by use of a small computer interfaced fast analyzer—an addition to automated clinical enzymology (S), 908
 fluorometric fast analyzer: some applications to fluorescence measurements in clinical chemistry (S), 871
 microanalysis for triglycerides using the centrifugal fast analyzer (A), 642
 micro-kinetic method for the detn. of gamma glutamyl transpeptidase on GEMSAEC (A), 683
 multiple wavelength readings on the ENI GEMSAEC for keto and ketogenic steroids (A), 659
 rapid and accurate detn. of triglycerides utilizing a new program to extrapolate to zero time on the GEMSAEC instrument (A), 674
 radiometric triglyceride analysis by centrifugal analyzer, 1060
 single-reagent method for rapid detn. of total bilirubin with the "CentrifChem" analyzer, 1366
 use of fluorometric fast analyzer for measuring enzyme activity—a discussion of direct referencing of fluorescence assays (A), 641
- Charcoal, dextran-coated**
 radioimmunoassay of plasma digoxin, with use of iodinated tracer, 187
- Charcoal, gelatin-coated**
 gelatin-coated charcoal in digoxin immunoassay (L), 140
- Charcoal, hemoglobin-coated**
 radioassay of serum folate, with use of a serum blank and nondialyzed milk as folate binder (SN), 125
 simplified, rapid measurement of triiodothyronine (T-131) uptake, with use of competitive charcoal adsorption, 45
- Chloride**
 automation of chloride and interference by halides (A), 661
 direct measurement of chloride in sweat with an ion-selective electrode, 727
- Cholestasis**
 significance of the LP-X test in differential diagnosis of jaundice, 86
- Cholesterol**
 apparent inconsistency between lipoprotein electrophoresis pattern (type II) and cholesterol concentration in serum (A), 673
 automated reaction-rate method for direct determination of total serum cholesterol with the CentrifChem parallel fast analyzer (S), 937
 automation and detn. of cholesterol (A), 669
 cholesterol oxidase from *Nocardia* and its application to enzymatic assay of total cholesterol in serum, 1350
 comparison of a direct kinetic method for cholesterol with an extraction procedure (L), 1415
 direct method for cholesterol determinations using the Clinocard system (A), 646
 direct serum cholesterol detns. using the CentrifChem (Union Carbide) parallel fast analyzer (A), 669
 effect of use of cholesterol digitonide in standards on results of estn. of cholesterol in blood and tissues by the Schoenheimer-Sperry method, 608
 ferric ammonium sulfate in serum cholesterol detn. (SN), 121
 kinetics of cholesterol-sulfuric acid reaction: fast kinetic method for serum cholesterol, 1128
 new approach to controlling serum cholesterol assays (A), 650
 reactivity of cholesterol and cholesterol esters using various color reagents (A), 600
 serum calibrators in Technicon AAI cholesterol analytical system (A), 650
 simultaneous detn. of cholesterol and triglycerides (A), 673
- Cholesterol oxidase**
 cholesterol oxidase from *Nocardia* and its application to enzymatic assay of total cholesterol in serum, 1350
- Cholinesterase**
 identn. of a new serum cholinesterase variant (A), 643
- Chorionic somatomammotropin**
 radioimmunoassay of human chorionic somatomammotropin in serum, amniotic fluid, and urine, 602
- Chromatography**
 affinity chromatography: theoretical aspects and clinical applications (A), 878
 biochemical properties of human prostatic acid phosphatase, 483
 common errors in detection of anticonvulsant drugs by gas liquid chromatography (A), 666
 computer technique for identification of chromatographic peaks (S), 826
 concentrations in serum and urinary excretion of guanidine, 1-methylguanidine, and 1,1-dimethylguanidine in chronic renal failure, 583
 detn. of alcohols in whole blood and tissue by pyrolysis gas chromatography (A), 662
 detn. of lecithin and sphingomyelin in amniotic fluid (SN), 1394
 detn. of lidocaine and procaine amide utilizing charcoal adsorption and gas liquid chromatography (GLC) (A), 660
 detn. of 3-methoxy-4-hydroxyphenylethylene glycol, a noradrenaline metabolite, in cerebrospinal fluid and urine, 1031
 detn. of serum and urinary phenylalanine by gas chromatography, 496
 drug fractionation methods for confirmation and identn. by GLC (A), 663
 efficiency and sensitivity of two common screening methods for detecting morphine in urine, 753
 evaluation of Dextsil 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109
 ferric chloride-impregnated silica gel for thin-layer chromatography of steroids (SN), 1305
 gas-chromatographic-mass-spectrometric detn. of urinary acid profiles of normal young adults on controlled diet, 586
 gas-chromatographic-mass-spectrometric detn. of urinary acid profiles of normal young adults. II. effect of ethanol, 963
 gas-chromatographic measurement of urinary polyamines in cancer patients (S), 904
 gas chromatography in diagnostic biochemistry of abnormal valine metabolism, 1040
 gas-liquid chromatography method for determining concn. of anti-fibrinolytic drug (Amicar) in serum and other biological fluids (A), 660
 GC assay of phenobarbital (L), 788
 glutathione concentration in serum and cerebrospinal fluid of humans in drug overdose, 1158
 high resolution gas liquid chromatography analysis and mass spectrometry applied to bladder cancer studies (A), 667
 homogeneous enzyme immunoassay for opiates in urine (S), 821
 identification of lithocholic acid and measurement of other bile acids in serum of healthy humans, 248
 identn. of drugs in urine by automated thin-layer chromatography (A), 663
 improved method for specific detn. of creatinine in serum and urine, 408
- methaqualone overdose: analytical methodology, and significance of serum drug concns., 615
 monitoring phenylalanine-tyrosine metabolism by high-resolution liquid chromatography of urine (S), 927
 nitrile-terminated hydrocarbons as stationary phases for high-performance liquid chromatography of steroid hormones, 1293
 para-hydroxyphenylacetic aciduria (A), 643
 plasma retinol assay by elution from silicic acid with cymene (p-isopropyl toluene), 977
 purification of progesterone antiserum for radioimmunoassay, by chromatography on QAE-Sephadex A-50, 1027
 quantitative determination of propoxyphene in serum by gas-liquid chromatography, 492
 quantitative determination of serum triglycerides by use of enzymes, 476
 radioimmunoassay of five unconjugated ovarian steroids in a single sample of serum or plasma, 210
 radioimmunoassay of serum estrogen, 740
 selection of solvent systems for thin-layer chromatography using an empirical index of solvent polarity (α -value) (A), 661
 sensitive fluorescence monitoring of aromatic acids after anion-exchange chromatography of body fluids (S), 817
 separation of bilirubin and biliverdin by thin layer chromatography (A), 647
 separation of tissue and serum creatine kinase isoenzymes by ion exchange chromatography (A), 646
 simple gas-liquid chromatographic method for confirming the presence of alkaloids in urine (SN), 340
 simplified gas chromatographic procedure for detn. of amino acid profiles in serum and urine samples (A), 646
 simplified gas chromatography of trimethylsilyl esters of C_3 through C_8 fatty acids in serum and urine, 1006
 simultaneous competitive protein-binding assay for cortisol, cortisone, and prednisolone in plasma, and its clinical application, 731
 simultaneous detn. of carbamazepine ("Tegretol") and other anticonvulsants in human plasma by gas-liquid chromatography, 590
 urinary homogenetic acid: detn. by thin-layer chromatography, 459
 use of high-pressure liquid chromatography for monitoring nucleotide concentration in human blood: a preliminary study with stored blood-cell suspensions (S), 919
 use of stable isotopes in measuring low concentrations of drugs and drug metabolites by GC-MS-COM procedures (S), 845
- Cirrhosis**
 gas-chromatographic-mass-spectrometric detn. of urinary acid profiles of normal young adults. II. effect of ethanol, 963
- Citrate metabolism**
 radiometric assay of citrate condensing enzyme (citrate synthetase) in liver tissue and mitochondria, 1106
- Citrate synthetase**
 radiometric assay of citrate condensing enzyme (citrate synthetase) in liver tissue and mitochondria, 1106
- Clinical Chemist, The**
 132, 267, 345, 438, 692, 798, 1091, 1324, 1335, 1417
- Clinicard system**
 comparison of results of several serum enzymes analyzed on the Clinocard-Harlico system versus the Gilford 3400 automated enzyme analyzer (A), 681
 detn. of serum uric acid using the Clinocard system (A), 674
 direct method for cholesterol determinations using the Clinocard system (A), 646
- Cocaine**
 homogeneous enzyme immunoassay for cocaine metabolite in urine (A), 663
- Colorimetry**
 colorimetric detn. of carbohydrates with m-aminophenol (MAP) (A), 660
 colorimetric detn. of

- 2,3-diphosphoglycerate in whole blood (SN), 118
- colorimetric error and reagent delivery error equations for colored reagents and their applications (A), 683
- colorimetric microdetermination of free fatty acids, 419
- continuous-flow colorimetry of serum triglycerides (SN), 1391
- improved colorimetric method for the detn. of serum triglycerides (A), 670
- improved colorimetric procedure for detn. of serum alanine aminotransferase and aspartate aminotransferase (A), 670
- improved manual and automated colorimetric detn. of serum glucose, with use of hexokinase and glucose-6-phosphate dehydrogenase (SN), 127
- improved manual spectrophotometric procedure for detn. of serum triglycerides (SN), 1077
- kinetic colorimetric measurement of serum lactate dehydrogenase activity, 766
- method for detn. of triglycerides in serum (SN), 1201
- serum triglycerides: specific colorimetric method (A), 681
- single glucose oxidase-peroxidase reagent for two-minute detn. of serum glucose, 959
- single-step kinetic colorimetric assay for lactate dehydrogenase in serum, 223
- specific photometric detn. of 5-hydroxyindoleacetic acid in urine, 38
- stable reagents for detn. of serum triglycerides by a colorimetric Hantzsch condensation method (SN), 338
- use of "Sephadex G-15" in an improved method for estrogens in pregnancy urine (SN), 1204
- Competitive protein binding**
- beta and gamma emitters in clinical radioimmunoassays and competitive-binding assays, 191
- competitive protein binding radioassay of plasma and urinary free cortisol (A), 653
- evaluation of folic acid in serum by lactobacillus casei bioassay and by competitive protein-binding radioassay (A), 652
- 17-hydroxyprogesterone: a simple competitive protein binding assay for routine use (A), 680
- improved measurement of corticosteroids in plasma and urine by competitive protein-binding radioassay, 511
- method for detn. of cyclic AMP in plasma, 312
- principles of competitive binding assays (saturation techniques). I. equilibrium techniques (R), 699
- radioassay of serum folate, 1101
- radioimmunoassay (R), 146
- radioimmunoassay of thyroxine in unextracted serum, by a single-antibody technique, 1063
- results by four different procedures for detn. of 17-hydroxycorticosteroids, 748
- serum thyroxine: results compared for a commercial radioimmunoassay and a commercial competitive protein binding analysis (SN), 1307
- simplified, rapid measurement of triiodothyronine (I-131) uptake, with use of competitive charcoal adsorption, 45
- simultaneous competitive protein-binding assay for cortisol, cortisone, and prednisolone in plasma, and its clinical application, 731
- stability of serum thyroxine (T_4) as measured by competitive protein binding methods (A), 680
- use of horse serum for measurement of corticosteroids in plasma and urine by competitive protein-binding radioassay (A), 652
- Computers**
- computer-assisted program applied to the diagnosis of thyroid disease (A), 649
- computer-controlled instrument system for sequential clinical chemical testing. I. instrumentation and system features, 1114
- computer-controlled instrument system for sequential clinical chemical testing. II. evaluation of instrumental performance, 1122
- computer technique for identification of chromatographic peaks (S), 826
- evaluation of kinetic enzyme parameters by use of a small computer interfaced fast analyzer—an addition to automated clinical enzymology (S), 908
- evaluation of the LABCOR clinical laboratory computer system (A), 678
- laboratory computers in monitoring kinetic enzyme assays, 27
- multi-purpose miniature computer for clinical applications, 304
- online computerized sequential testing in the clinical laboratory (A), 660
- program for on-line processing of peak type AutoAnalyzer signals (A), 677
- rapid data dissemination of laboratory tests (A), 676
- report system for a large laboratory using a time-sharing utility (A), 677
- use of a desk-top computer for a comprehensive laboratory quality control program as exemplified by T_4 -RIA (A), 649
- utiln. of computers in industrial preparation of control serum (A), 677
- Copper**
- measurement of copper and iron in a single aliquot with bis(1-piperidylthiocarbonyl) disulfide (PTD) and 3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine (PDT) (A), 671
- Corrections**
- 288, 535, 1084, 1399
- Correlations**
- estimating correlations from single-sample distributions of measurements, 81
- Corticosteroids**
- improved measurement of corticosteroids in plasma and urine by competitive protein-binding radioassay, 511
- use of horse serum for measurement of corticosteroids in plasma and urine by competitive protein-binding radioassay (A), 652
- Cortisol**
- competitive protein binding radioassay of plasma and urinary free cortisol (A), 653
- fluorometric measurement of urinary free hydrocortisone (cortisol) (SM), 1400
- nonspecific interferences in fluorometric detn. of plasma cortisol (SN), 258
- simultaneous assay of plasma cortisol (F) and 11-deoxycortisol (S) in a metyrapone test (A), 678
- simultaneous competitive protein-binding assay for cortisol, cortisone, and prednisolone in plasma, and its clinical application, 731
- values for urinary free cortisol during treatment with amino-glutethimide for Cushing's syndrome (CR), 1067
- Cortisone**
- simultaneous competitive protein-binding assay for cortisol, cortisone, and prednisolone in plasma, and its clinical application, 731
- Counterimmunoelectrophoresis**
- evaluation of a rapid latex-agglutination test for detection of alpha-1-fetoprotein (SN), 1069
- Creatine kinase**
- activation of creatine kinase with dithiothreitol: application to the Gilford 3400 automatic enzyme analyzer (A), 665
- creatine kinase: ATP contaminating creatine phosphate substrate of a commercial kit (L), 280
- detn. of creatine phosphokinase (A), 662
- discrepancies in kinetic creatine kinase results obtained using various reagents (A), 682
- effect of sample dilution upon kinetic CPK determinations (A), 661
- effect of various serum diluents on activity of creatine phosphokinase (CPK), alkaline phosphatase (AP), lactate dehydrogenase (LD), and aspartate transaminase (SGOT) (A), 665
- evaln. of direct and indirect coupled enzyme assay systems for measurement of creatine kinase activity, 994
- influences of serum enzymes on the results of CK activity detns. (A), 665
- perils and pitfalls of CPK coupled enzymatic assay: comparison of enzymatic and colorimetric methods (A), 676
- "reagentless" fluorometric method for creatine kinase activity in serum, 1045
- separation of tissue and serum creatine kinase isoenzymes by ion exchange chromatography (A), 646
- Creatinine**
- automated kinetic creatinine method with increased stability and sensitivity (A), 675
- direct detn. of serum creatinine using an ion-exchange resin (A), 681
- evaln. of an automated creatininase creatinine procedure (SN), 623
- improved method for specific detn. of creatinine in serum and urine, 408
- Cushing's syndrome**
- values for urinary free cortisol during treatment with amino-glutethimide for Cushing's syndrome (CR), 1067
- Cyanide**
- microdiffusion method for estimation of cyanide in whole blood and its application to the study of conversion of cyanide to thiocyanate, 466
- Cyclic AMP**
- clinical studies and applications of cyclic AMP (A), 631
- method for detn. of cyclic AMP in plasma, 312
- Cystic fibrosis**
- screening for cystic fibrosis by specific ion electrode (L), 1319
- Cystine aminopeptidase**
- evaln. of S-benzyl-L-cysteine-4'-nitroanilide as a substrate for serum cystine aminopeptidase, 756
- Data processing**
- multi-purpose miniature computer for clinical applications, 304
- Delves micro system**
- eval. of Delves micro system for blood lead analysis, 322
- Deoxycortisol**
- simultaneous assay of plasma cortisol (F) and 11-deoxycortisol (S) in a metyrapone test (A), 678
- Dermatomyositis**
- dermatomyositis: urinary chromatographic findings by alkaline autoanalysis for peptides (L), 1412
- Dextran-coated charcoal**
- radioimmunoassay of serum estrogen, 740
- Diabetes mellitus**
- serum enzymes in diabetes mellitus (R), 447
- Diabetic coma**
- interpretation of hyperamylasemia in diabetic coma, 387
- Diagnostic aids**
- anomalous response of amylase to assay temperature (SN), 123
- application of Fe(II)-5-pyridyl benzodiazepin-2-ones to the manual or automated detn. of serum uric acid, 67
- automated fluorometric method for screening for erythrocyte glucose-6-phosphate dehydrogenase deficiency, 301
- automated kinetic spectrophotometric assays of enzyme activities of human cerebrospinal fluid: methods and reference values, 240
- automated procedure for detection of rheumatoid arthritis (A), 672
- automated procedure for detection of infectious mononucleosis (A), 681
- beta and gamma emitters in clinical radioimmunoassays and competitive-binding assays, 191
- bilirubin binding affinity of serum: comparison of qual. and quant. Sephadex gel-filtration methods, 1276
- biochemical properties of human prostatic acid phosphatase, 483
- design, construction, and two applications for an automated flow-cell polarization fluorometer with digital read out: enzyme-inhibitor (antitrypsin) assay and antigen-antibody (insulin-insulin antiserum) assay (S), 838
- diagnostic accuracy of HBD assays by original and revised spectrophotometric procedures, 1387
- electrophoresis, specific protein assays, or both in measurement of plasma proteins? (O), 99
- enzymes in cancer (R), 10
- evaluation of Dextal 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109

- free calcium in serum. II. rigor of homeostatic control, correlations with total serum calcium, and review of data on patients with disturbed calcium metabolism, 575
- gas-chromatographic-mass-spectrometric detn. of urinary acid profiles of normal young adults on controlled diet, 586
- gradient gel electrophoresis of human plasma lipoproteins, 415
- HBD:LDH ratios - usefulness in differential heart:liver diagnosis (A), 643
- hydrochlorothiazide interference with measurement of total urinary placental estrogens (SN), 261
- improved techniques for assessment of plasma lipoprotein patterns. I. precipitation in gels after electrophoresis with polyanionic compounds, 737
- isoenzymes of liver alkaline phosphatase in serum of patients with hepatobiliary disorders, 1142
- liquid-scintillation counting of [^{14}C]—application to radioassay of vitamin B₁₂, 998
- measurement of putrescine, spermidine, and spermine in physiological fluids by use of an amino acid analyzer (S), 923
- overnight radioimmunoassay of human follicle-stimulating hormone, 197
- polyacrylamide-gel disc-electrophoresis as a screening procedure for serum lipoprotein abnormalities, 228
- proposed standard method for measuring lipase activity in serum by a continuous sampling technique, 1268
- radiometric assay of citrate condensing enzyme (citrate synthetase) in liver tissue and mitochondria, 1106
- significance of the LP-X test in differential diagnosis of jaundice, 86
- simplified gas chromatography of trimethylsilyl esters of C₁ through C₈ fatty acids in serum and urine, 1006
- specific analysis of immunoglobulins: techniques and clinical value, 294
- urinary proteins studied by use of isoelectric focusing. I. tubular malfunction in association with exposure to cadmium, 1179
- usefulness of laboratory tests in health-screening programs (O), 366
- Diaphorase**
improved manual and automated colorimetric detn. of serum glucose, with use of hexokinase and glucose-6-phosphate dehydrogenase (SN), 127
- Diet**
influence of diet on urine ketone excretion (A), 653
- Differential III system**
clinical laboratory use of differential light scattering. I. antibiotic susceptibility testing (S), 883
- Differential light scattering**
clinical laboratory use of differential light scattering. I. antibiotic susceptibility testing (S), 883
- Digoxin**
detn. of safe and therapeutically effective doses of digoxin in infants and children (A), 644
digoxin radioimmunoassay: dealing with loss of sensitivity (L), 688
elimination of error due to hemolysis-induced color quenching in digoxin radioimmunoassay (A), 651
gelatin-coated charcoal in digoxin immunoassay (L), 140
measurement of therapeutic and toxic digoxin levels in human serum by radioimmunoassay (A), 651
radioassay of digoxin (L), 1413
radioimmunoassay of digoxin: intercomparison of results with three methods, 1058
radioimmunoassay of plasma digoxin, with use of iodinated tracer, 187
solid-phase radioimmunoassay for digoxin, 1361
variability of standard curves in radioimmunoassay of plasma digoxin, 725
- Dimethylguanidine**
concentrations in serum and urinary excretion of guanidine, 1-methylguanidine, and 1,1-dimethylguanidine in chronic renal failure, 583
- Diphenylhydantoin**
diphenylhydantoin interference with spectrophotometric barbiturate estimations (L), 1318
- 2,3-Diphosphoglycerate**
colorimetric detn. of 2,3-diphosphoglycerate in whole blood (SN), 118
- Discriminant function analysis**
estimating correlations from single-sample distributions of measurements, 81
- DNA**
clinical application of a radioimmunoassay for DNA antibodies in systemic lupus erythematosus (A), 654
- DOPA**
automated method for the detn. of DOPA in plasma (A), 675
- Drug assay**
a single pH extraction procedure for detecting drugs of abuse in urine (A), 663
automated fluorometric detn. of amphetamine in urine, 390
comparison of the detection of anticonvulsant drugs in whole blood, hemolyzed blood and plasma by gas liquid chromatography (A), 660
detn. of gold in drugs and serum by anodic stripping voltammetry, 1002
detn. of lidocaine and procaine amide utilizing charcoal adsorption and gas liquid chromatography (GLC) (A), 660
detn. of safe and therapeutically effective doses of digoxin in infants and children (A), 644
diphenylhydantoin interference with spectrophotometric barbiturate estimations (L), 433
drug fractionation methods for confirmation and identn. by GLC (A), 663
efficiency and sensitivity of two common screening methods for detecting morphine in urine, 753
evaln. of a hemagglutination inhibition method for detection of morphine in urine (A), 663
evaluation of thirteen iodoplatinate reagents for the qualitative detection of drugs of abuse (A), 664
gas-liquid chromatography method for determining concn. of anti-fibrinolytic drug (Amicar) in serum and other biological fluids (A), 660
GC assay of phenobarbital (L), 788
glutethimide concentration in serum and cerebrospinal fluid of humans in drug overdose, 1158
homogeneous enzyme immunoassay for cocaine metabolite in urine (A), 663
homogeneous enzyme immunoassay for opiates in urine (S), 821
identn. of drugs in urine by automated thin-layer chromatography (A), 663
measurement of therapeutic and toxic digoxin levels in human serum by radioimmunoassay (A), 651
methaqualone overdose: analytical methodology, and significance of serum drug concns., 615
procedures for screening a single sample (blood or urine) for barbiturates, hypnotics, amphetamines, narcotics, and other abused drugs by GLC, TLC, and UV (A), 663
quantitative determination of propoxyphene in serum by gas-liquid chromatography, 492
simple gas-liquid chromatographic method for confirming the presence of alkaloids in urine (SN), 340
simultaneous detn. of carbamazepine ("Tegretol") and other anticonvulsants in human plasma by gas-liquid chromatography, 590
simultaneous, quantitative detn. of three antiepileptic drugs: phenobarbital, primidone and diphenylhydantoin by GLC. the optimization of sample handling, extraction, chromatographic separation, and the study of interferences contributing to non-specificity (A), 659
source of variation in the gas-chromatographic assay of phenobarbital treated with trimethylanilinium hydroxide (L), 359
spray for thin-layer chromatograms of narcotics (L), 356
- toxicological findings in fatal poisonings (R), 361
use of stable isotopes in measuring low concentrations of drugs and drug metabolites by GC-MS-COM procedures (S), 845
- Du Pont ACA**
application of automated detn. of isoenzyme-5 of lactate dehydrogenase to diagnosis of hepatic disease, 1036
comparison of four methods for measuring uric acid: copper-chelate, phosphotungstate, manual uricase, and automated kinetic uricase, 1184

routine toxicology quality control (A), 683
use of a desk-top computer for a comprehensive laboratory quality control program as exemplified by T_4 -RIA (A), 649
use of tris buffers for quality control of pH measurements (A), 651
value of long-term quality control records in a clinical laboratory (A), 649

Quercetin

fluorometric method for detn. of quercetin in plasma or urine, 36

Radioassay

comparative radioassay methods for the detn. of serum vitamin B_{12} (A), 652
comparison of two methods for radioassay of Vitamin B_{12} in serum, 1357
improved measurement of corticosteroids in plasma and urine by competitive protein-binding radioassay, 511
liquid-scintillation counting of [^{57}Co]-application to radioassay of vitamin B_{12} , 998
radioassay of digoxin (L), 1413
radioassay of folate (L), 785
radioassay of serum folate, 1101
radioassay of serum folate, with use of a serum blank and nondialyzed milk as folate binder (SN), 125
radiometric assay of citrate condensing enzyme (citrate synthetase) in liver tissue and mitochondria, 1106
rapid, micro radioassay for serum folate (A), 652

Radioimmunoassay

beta and gamma emitters in clinical radioimmunoassays and competitive-binding assays, 191
clinical application of a radioimmunoassay for DNA antibodies in systemic lupus erythematosus (A), 654
clinical evaluation of a rapid radioimmunoassay procedure for plasma estrogens (A), 680
digoxin radioimmunoassay: dealing with a loss of sensitivity (L), 688
elimination of error due to hemolysis-induced color quenching in digoxin radioimmunoassay (A), 651
gel entrapment of antibody: new strategy for facilitating manual and automated radioimmunoassay, 1339
measurement of serum triiodothyronine levels using a sensitive radioimmunoassay technique (A), 651
measurement of therapeutic and toxic digoxin levels in human serum by radioimmunoassay (A), 651
modified radioimmunoassay of urinary aldosterone (L), 279
overnight radioimmunoassay for human luteinizing hormone (HLH) (A), 652
overnight radioimmunoassay of human follicle-stimulating hormone, 197
plasma renin activity: method for rapid screening by radioimmunoassay and a comparison of two commercially available kits, 1396
purification of progesterone antiserum for radioimmunoassay, by chromatography on QAE-Sephadex A-50, 1027
radioimmunoassay (E), 145
radioimmunoassay (R), 146
radioimmunoassay for morphine and immunologically related substances in urine and serum, 216
radioimmunoassay of digoxin: intercomparison of results with three methods, 1058

radioimmunoassay of five unconjugated ovarian steroids in a single sample of serum or plasma, 210
radioimmunoassay of human chorionic somatomotropin in serum, amniotic fluid, and urine, 602
radioimmunoassay of insulin in serum and plasma, 1250
radioimmunoassay of nonpeptide substances (A), 627
radioimmunoassay of plasma digoxin, with use of iodinated tracer, 187
radioimmunoassay of serum estrogen, 740
radioimmunoassay of serum parathyroid hormone, 205
radioimmunoassay of thyroxine in unextracted serum, by a single-antibody technique, 1063
rapid radioimmunoassay of triiodothyronine, 1016
serum thyroxine: results compared for a commercial radioimmunoassay and a commercial competitive protein binding analysis (SN), 1307
solid-phase radioimmunoassay for digoxin, 1361
variability of standard curves in radioimmunoassay of plasma digoxin, 725
variables in radioimmunological technique for measuring immunoreactive insulin with use of immunosorbents, 201

Reference materials

an idea whose time has come (E), 291
cooperative survey of SMA analyzers in Wisconsin: method of improving interlaboratory performance, 62

Reference sera

Australia antigen content of commercial quality-control sera, 221

Renal disease

urinary proteins studied by use of isoelectric focusing. I. tubular malfunction in association with exposure to cadmium, 1179

Renal disease, Chromatography

urinary guanidinoacetate to guanidinosuccinate ratio: an indicator of kidney dysfunction, 315

Renal failure

concentrations in serum and urinary excretion of guanidine, 1-methylguanidine, and 1,1-dimethylguanidine in chronic renal failure, 583

Renal preservation

critical evaluation of viability assays in renal preservation (A), 654

Renin

plasma renin activity: method for rapid screening by radioimmunoassay and a comparison of two commercially available kits, 1396

Research by clinical chemists

further statistics and commentary on research by clinical chemists in the United States (A), 680
further statistics and commentary on research by clinical chemists in the United States (L), 1096

Retinol

plasma retinol assay by elution from silicic acid with cymene (p-isopropyl toluene), 977

Reviewers

invited reviewers, 1973, 1416

Rotochem II parallel fast analyzer

Aminco Rotochem II parallel fast analyzer - an evaluation (A), 641

Sample concentration

gas manifold for use in sample concentration (L), 687

Scientific writing

precise descriptions in papers (L), 790

Screening

automated measurement of urinary iodine, 950
automatic extension of screening studies in the clinical laboratory (A), 651
comparison of results for three methods of hemoglobin S identification (SN), 533
cooperative survey of SMA analyzers in Wisconsin: method of improving interlaboratory performance, 62
coupling of glucose-6-phosphate dehydrogenase and hemoglobin S screening to automated blood group and type detns., 1389
design, construction, and two applications for an automated flow-cell polarization fluorometer with digital read out:

enzyme-inhibitor (antitrypsin) assay and antigen-antibody (insulin-insulin antiserum) assay (S), 838
detn. of total organic acids in urine by extraction with organic solvents, 593
development and application of a rapid cell sorter (S), 813
estimation of norms from a controlled sample survey. II. influence of body habitus, oral contraceptives, and other factors on values for the normal range derived from the SMA 12:60 screening group of tests, 488
evaluation of a rapid latex-agglutination test for detection of alpha-1-fetoprotein (SN), 1069

fluorometric detn. of plasma 11-hydroxycorticosteroids. I. rapid procedure for clinical screening, 710
modified Pisano method for estimating urinary metanephries, 611
modified sickle cell anemia screening procedure (L), 284
polyacrylamide-gel disc-electrophoresis as a screening procedure for serum lipoprotein abnormalities, 228
relationships between urinary aminoimidazolecarboxamide in urine, and folate and vitamin B_{12} concentrations in serum, 1049
screening for galactosemia and galactokinase deficiency by measuring galactose in whole blood spotted on paper, 463
simple rapid sickle cell anemia screening test (A), 654
simplified detn. of urinary cadmium, lead, and thallium, with use of carbon rod atomization and atomic absorption spectrophotometry, 954
stability of erythrocytic enzymes for screening tests (SN), 529
statistical model for assessing the need for medical care in a health screening program (SN), 113
usefulness of laboratory tests in health-screening programs (O), 366

Screening procedure

eval. of Delves micro system for blood lead analysis, 322

Selected methods

colorimetric detn. of serum cholinesterase and its genetic variants by the propionylthiocarbonyl-dithiobis(nitrobenzoic acid) procedure (SM), 1309
fluorometric measurement of urinary free hydrocortisone (cortisol) (SM), 1400
measurement of carcinoembryonic antigen (SM), 1214
radioimmunoassay of plasma progesterone (SM), 1403
referee method for detn. of total calcium in serum (SM), 1208
selected methods (E), 1207
Selective membrane permeability
isolation of erythropoiesis regulatory factors by an electrofractionation technique combined with selective membrane permeability (A), 644

Selenium

selenium in blood of normals, cancer patients and patients with other diseases (A), 672

Serratia organisms

test for bacterial alkaline phosphatase: rapid identn. of Serratia organisms, 1248

SGOT

See Aspartate aminotransferase

Sialic acids

improved automated detn. of bound N-acetylneuramic acid in serum, 1285

Sickle cell anemia

comparison of results for three methods of hemoglobin S identification (SN), 533
detection of prostaglandin induction of erythrocyte sickling, 23
modified sickle cell anemia screening procedure (L), 284
simple rapid sickle cell anemia screening test (A), 654

Sickle cell disease

electrophoresis of hemoglobin on polyacrylamide gels: precise method for measurement of hemoglobin A2 (SN), 1082

SI units

recommendation for use of SI units in clinical laboratory measurements, 135

SMA 12:60

adaptation of some SMA 12:60 procedures to the basic AA system (A), 648

- adaptation of some SMA 12:60 procedures to the basic AA system (A), 681
- comparison of results between Technicon SMA 12:60 glucose oxidase method and other automated glucose methods (A), 442
- comparison of stannous chloride and vanadate methods for estimation of serum inorganic phosphorus by use of the SMA 12:60, 411
- estimation of norms from a controlled sample survey. II. influence of body habitus, oral contraceptives, and other factors on values for the normal range derived from the SMA 12:60 screening group of tests, 488
- reference standardization methods for calibration of enzyme channels on the SMA 12:60 (A), 661
- standardization and quality control of the SMA 12:60 and SMA 6:60 using aqueous standards (A), 650
- three year analysis of performance stability, accuracy and precision for SMA and mark analyzers (A), 650
- Sodium**
- all solid-state electrochemical electrolyte analyzer (S), 891
- modified indirect method for determining erythrocyte sodium and potassium concentrations, 506
- serum sodium measurement by manual and on-line dilutions (L), 791
- Specific ion electrode**
- screening for cystic fibrosis by specific ion electrode (L), 1319
- Spectrophotometry**
- accurate micromethod for estimation of both medium- and long-chain fatty acids and triglycerides in fecal fat, 499
- a common error in measurements at 340 nm (L), 434
- bilirubin interference with ultraviolet determination of inorganic phosphate on the "CentrifChem" (L), 436
- diagnostic accuracy of HBD assays by original and revised spectrophotometric procedures, 1387
- diphenylhydantoin interference with spectrophotometric barbiturate estimations (L), 433
- improved manual spectrophotometric procedure for detn. of serum triglycerides (SN), 1077
- methaqualone overdose: analytical methodology, and significance of serum drug concns., 615
- micromethod for detn. of protein in cerebrospinal fluid and urine, 1265
- new spectrophotometric enzymatic detn. of serum triglycerides (A), 656
- spectrophotometric detn. of calcium with chlorophosphonazo III (A), 671
- spectrophotometric quantn. of glycine in serum and urine, 1010
- standard reference materials: standard quartz cuvettes for high-accuracy spectrophotometry, 1053
- UV spectrophotometry in medium-band instruments (L), 783
- Sphingomyelin**
- detn. of lecithin and sphingomyelin in amniotic fluid (SN), 1394
- Standard reference materials**
- standard reference materials: standard quartz cuvettes for high-accuracy spectrophotometry, 1053
- Standards**
- an idea whose time has come (E), 291
- "standards" in clinical chemistry (L), 789
- Statistics**
- estimating correlations from single-sample distributions of measurements, 81
- multivariate approach in clinical chemistry (R), 1329
- statistical model for assessing the need for medical care in a health screening program (SN), 113
- use and interpretation of common statistical tests in method comparison studies, 49
- usefulness of laboratory tests in health-screening programs (O), 366
- Steroids**
- See also Corticosteroids, 17-Ketosteroids
- ferric chloride-impregnated silica gel for thin-layer chromatography of steroids (SN), 1305
- fluorometric detn. of plasma 11-hydroxycorticosteroids. I. rapid procedure for clinical screening, 710
- fluorometric detn. of plasma 11-hydroxycorticosteroids. II. studies on specificity, 718
- fluorometric measurement of urinary free hydrocortisone (cortisol) (SM), 1400
- hydrochlorothiazide interference with measurement of total urinary placental estrogens (SN), 261
- modified radioimmunoassay of urinary aldosterone (L), 279
- multiple wavelength readings on the ENI Gemsac for keto and ketogenic steroids (A), 659
- nitrile-terminated hydrocarbons as stationary phases for high-performance liquid chromatography of steroid hormones, 1293
- radioimmunoassay of five unconjugated ovarian steroids in a single sample of serum or plasma, 210
- results by four different procedures for detn. of 17-hydroxycorticosteroids, 748
- semiautomated method for analysis of 11-deoxy-17-oxo steroids in urine. preliminary report, 706
- simultaneous competitive protein-binding assay for cortisol, cortisone, and prednisolone in plasma, and its clinical application, 731
- Stress**
- effect of stress and adrenalectomy on plasma calcium, magnesium, and phosphate (A), 642
- Sweat**
- direct measurement of chloride in sweat with an ion-selective electrode, 727
- Symposium, adv. anal. concepts**
- introduction (S), 806
- Systemic lupus erythematosus**
- clinical application of a radioimmunoassay for DNA antibodies in systemic lupus erythematosus (A), 654
- T₃**
- evaluation of Dextsil 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109
- simplified, rapid measurement of triiodothyronine (I-131) uptake, with use of competitive charcoal adsorption, 45
- T₄**
- evaluation of Dextsil 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109
- simplified, rapid measurement of triiodothyronine (I-131) uptake, with use of competitive charcoal adsorption, 45
- Tay-Sachs disease**
- the automated assay of hexosaminidases in serum, 1345
- Testosterone**
- simple plasma testosterone method without chromatography for the routine clinical laboratory (A), 679
- Tetrahydro compound S**
- simultaneous detn. of urinary tetrahydro compound S and total 17-hydroxycorticosteroids (A), 678
- Thiamine**
- thiamine assay by the thiochrome method with prior adsorption and desorption on cationic exchange resin (A), 644
- Thiocyanate**
- microdiffusion method for estimation of cyanide in whole blood and its application to the study of conversion of cyanide to thiocyanate, 466
- Thymolphthalein monophosphate**
- AutoAnalyzer assay for serum alkaline phosphatase activity with sodium thymolphthalein monophosphate as substrate (SN), 103
- Thyroid disease**
- computer-assisted program applied to the diagnosis of thyroid disease (A), 649
- evaluation of Dextsil 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109
- Thyroid function**
- radioimmunoassay of thyroxine in unextracted serum, by a single-antibody technique, 1063
- rapid radioimmunoassay of triiodothyronine, 1016
- Thyroxine**
- comparison between T-3 x T-4 index and a newly developed test: compensated T-4 (A), 679
- evaluation of Dextsil 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109
- radioimmunoassay of thyroxine in unextracted serum, by a single-antibody technique, 1063
- Titrimetry**
- proposed standard method for measuring lipase activity in serum by a continuous sampling technique, 1268
- Total iron-binding capacity**
- See Iron
- Toxicology**
- See also Drug assay
- See also Trace elements
- a single pH extraction procedure for detecting drugs of abuse in urine (A), 663
- detn. of gold in drugs and serum by anodic stripping voltammetry, 1002
- detn. of safe and therapeutically effective doses of digoxin in infants and children (A), 644
- glutethimide and its major metabolite in serum and cerebrospinal fluid after overdose (A), 666
- glutethimide concentration in serum and cerebrospinal fluid of humans in drug overdose, 1158
- marihuana metabolites in urine of man, II. After oral ingestion of synthetic Δ^9 -tetrahydrocannabinol (A), 667
- methaqualone, a new drug of abuse: studies of analytical methodology and interpretation of serum drug levels in overdose (A), 666
- methaqualone overdose: analytical methodology, and significance of serum drug concns., 615
- microdiffusion method for estimation of cyanide in whole blood and its application to the study of conversion of cyanide to thiocyanate, 466
- procedures for screening a single sample (blood or urine) for barbiturates, hypnotics, amphetamines, narcotics, and other abused drugs by GLC, TLC, and UV (A), 663
- quantitative determination of propoxyphene in serum by gas-liquid chromatography, 492
- routine toxicology quality control (A), 683
- toxicological findings in fatal poisonings (R), 361
- use of stable isotopes in measuring low concentrations of drugs and drug metabolites by GC-MS-COM procedures (S), 845
- Trace elements**
- analysis of cadmium, lead, and thallium in urine by the carbon rod atomizer and atomic absorption spectrophotometry (A), 670
- application of inductively-coupled plasma excitation sources to detn. of trace metals in microliter volumes of biological fluids (S), 807
- atomic absorption spectrometry of Ni, Cu, Zn, Pb, in sweat collected from healthy subjects during sauna bathing, 1288
- detn. of gold in drugs and serum by anodic stripping voltammetry, 1002
- detn. of lead in blood and urine by anodic stripping voltammetry, 76
- estimation of gold in urine by atomic absorption spectroscopy (SN), 1081
- excretion of nickel, copper, zinc and lead in sweat of healthy subjects during sauna bathing (A), 642
- fecal nickel excretion by healthy adults (SN), 429
- inherent analytical errors in the measurement of lead in blood using the graphite furnace atomic absorption spectrophotometer (A), 671
- measurement of copper and iron in a single aliquot with bis(1-piperidylthiocarbonyl) disulfide (PTD) and 3-(2-pyridyl)-5,6-diphenyl-1,2,4-triazine (PDT) (A), 671
- simplified detn. of urinary cadmium, lead, and thallium, with use of carbon rod atomization and atomic absorption spectrophotometry, 954

- the detn. of trace metals at natural levels in biological materials using atomic absorption and the graphite furnace (A), 671
- trace-element contamination in biopsies of the liver, 472
- Trace-metal contaminants**
- trace-metal contaminants in filter paper (L), 141
- Trace metals**
- trace-metal contaminants in filter paper (L), 141
- urinary proteins studied by use of isoelectric focusing. I. tubular malfunction in association with exposure to cadmium, 1179
- Training**
- ABCC-approved clinical chemistry training programs, 135
- conference on education, 1419
- Transferrin**
- micro techniques for immunochemical measurement of albumin, transferrin, and alpha-2 macroglobulin in urine (A), 672
- Trichloroethanol**
- urinary trichloroethanol as a biological indicator of occupational exposure to trichloroethylene (A), 667
- Triglycerides**
- accurate micromethod for estimation of both medium- and long-chain fatty acids and triglycerides in fecal fat, 499
- a simplified continuous flow semi-micro method for the detn. of triglycerides (A), 673
- assessment of the need for triglyceride blank measurements (SN), 1193
- automated enzymatic detn. of serum triglycerides (A), 669
- automated enzymatic triglyceride assay utilizing the Hycel Mark X (A), 674
- continuous-flow colorimetry of serum triglycerides (SN), 1391
- enzymatic assay of serum triglycerides (A), 657
- improved colorimetric method for the detn. of serum triglycerides (A), 670
- improved manual spectrophotometric procedure for detn. of serum triglycerides (SN), 1077
- method for detn. of triglycerides in serum (SN), 1201
- microanalysis for triglycerides using the centrifugal fast analyzer (A), 642
- new spectrophotometric enzymatic detn. of serum triglycerides (A), 656
- propylene glycol interference in detn. of serum and liver triglycerides (SN), 1071
- quantitative determination of serum triglycerides by use of enzymes, 476
- rapid and accurate detn. of triglycerides utilizing a new program to extrapolate to zero time on the GEMSAEC instrument (A), 674
- ratimetric triglyceride analysis by centrifugal analyzer, 1060
- semiautomated enzymatic method for detng. serum triglycerides by use of the Beckman DSA 560 (SN), 116
- serum triglycerides: specific colorimetric method (A), 651
- simultaneous detn. of cholesterol and triglycerides (A), 673
- stable reagents for detn. of serum triglycerides by a colorimetric Hantzsch condensation method (SN), 338
- Triiodothyronine**
- evaluation of Dextsil 300 GC as stationary phase in gas chromatography of triiodothyronine and thyroxine in human serum (SN), 109
- measurement of serum triiodothyronine levels using a sensitive radioimmunoassay technique (A), 651
- rapid radioimmunoassay of triiodothyronine, 1016
- Triiodothyronine (I-131)**
- simplified, rapid measurement of triiodothyronine (I-131) uptake, with use of competitive charcoal adsorption, 45
- Tryptophan**
- assay for tryptophan in serum, 1112
- Turbidimetry**
- turbidimetric procedure for detn. of lipase activity, 384
- Urea nitrogen**
- a stable stock arsenic pentoxide reagent for use in preparing diacetyl monoxime reagent for a urea nitrogen procedure (L), 1087
- effect of hemolysis on values obtained for urea nitrogen in plasma (L), 1226
- Uremia**
- concentrations in serum and urinary excretion of guanidine, and 1, 1-dimethylguanidine in chronic renal failure, 583
- Uric acid**
- application of Fe(II)-5-pyridyl benzodiazepin-2-ones to the manual or automated detn. of serum uric acid, 67
- automated uric acid test for the Centrifichem analyzer using a direct uricase reagent (A), 674
- comparison of four methods for measuring uric acid: copper-chelate, phosphotungstate, manual uricase, and automated kinetic uricase, 1184
- detn. of serum uric acid using the Clinicard system (A), 674
- detn. of uric acid in serum, with use of uricase and a tribromophenol-aminoantipyrine chromogen (SN), 522
- formaldehyde interference in the uric acid-phosphotungstic acid redox (SN), 531
- study of intelligence, learning and serum uric acid levels (A), 668
- uric acid analysis: experience with two innovative systems (A), 675
- Uricase**
- detn. of uric acid in serum, with use of uricase and a tribromophenol-aminoantipyrine chromogen (SN), 522
- Valine**
- gas chromatography in diagnostic biochemistry of abnormal valine metabolism, 1040
- Vanillylmandelic acid**
- rapid detn. of vanillylmandelic acid in urine by ion exchange (A), 646
- Variation**
- urinary homogentisic acid: detn. by thin-layer chromatography, 459
- Variation, source of**
- a method for computation of age-dependent reference intervals (A), 676
- automated kinetic spectrophotometric assays of enzyme activities of human cerebrospinal fluid: methods and reference values, 240
- automated measurement of urinary iodine, 950
- decisions on the acceptability of performance in method comparison studies (A), 650
- effect on chemical values of using polystyrene beads for serum separation (L), 792
- effects of eating on within-day variation of serum constituents in normals (A), 676
- estimating correlations from single-sample distributions of measurements, 81
- estimation of norms from a controlled sample survey. II. influence of body habitus, oral contraceptives, and other factors on values for the normal range derived from the SMA 12:60 screening group of tests, 488
- evaln. and recalcn. of manufacturer's instrument-specific aspartate aminotransferase values for reference sera, 973
- factors contributing to intraindividual variation of serum constituents: I. within-day variation of serum constituents in healthy subjects, 1374
- factors contributing to intraindividual variation of serum constituents: 2. effects of exercise and diet on the variation of serum constituents in healthy subjects, 1380
- free calcium in serum. I. detn. with ion-specific electrode, and factors affecting results, 565
- gas-chromatographic-mass-spectrometric detn. of urinary acid profiles of normal young adults. II. effect of ethanol, 963
- influence of demographic factors on serum concentrations of seven chemical constituents in healthy human subjects, 395
- multivariate approach in clinical chemistry (R), 1329
- relationship between variables in instrument performance and results of kinetic enzyme assays—a system view (S), 832
- stability of sera (L), 559
- standardization in bilirubin assays: evaln. of selected methods and stability of bilirubin solutions, 984
- standard reference materials: standard quartz cuvettes for high-accuracy spectrophotometry, 1053
- stated values for commercial sera may be unreliable from date of manufacture (L), 1228
- three year analysis of performance stability, accuracy and precision for SMA and mark analyzers (A), 650
- Vitamin A**
- plasma retinol assay by elution from silicic acid with cymene (p-isopropyl toluene), 977
- Vitamin B₁₂**
- comparative radioassay methods for the detn. of serum vitamin B₁₂ (A), 652
- comparison of two methods for radioassay of Vitamin B₁₂ in serum, 1357
- liquid-scintillation counting of [³⁷Co]—application to radioassay of vitamin B₁₂, 998
- radioisotopic assay of vitamin B₁₂ using a liquid scintillation system (A), 652
- relationships between urinary aminoimidazolecarboxamide in urine, and folate and vitamin B₁₂ concentrations in serum, 1049
- Water purification**
- performance evaluation of three water purification systems (A), 648
- Xylose**
- measurement of absorption of D-xylose in serum and urine by a modified time-reducing method (A), 682
- Zimmerman reaction**
- semiautomated method for analysis of 11-deoxy-17-oxo steroids in urine. preliminary report, 706
